Vision, Mental Imagery and the Christian Life Zoltán Dörnyei,2019-07-03 This book uniquely explores how the notion of vision is presented in modern science and the Bible and how it can be applied to contemporary Christian contexts The word vision our ability to see has been described by an increasing body of scholarship in the social sciences as our capacity for mental imagery and imagination As such this unique cognitive capability has been utilised in many fields for a variety of purposes from arts and psychotherapy to politics and business management and even for performance enhancement in sports The current book argues that a better understanding of vision can have far reaching practical implications for Christian life and ministry by helping people to align themselves with God s specific purposes After a theoretical overview that integrates scientific and theological insights the final chapters present a variety of strategies that can help believers to discern God s call through the use of mental imagery and then to develop and cultivate the perceived vision The book examines the scientific and biblical principles of vision in a comprehensive manner with a special emphasis on the practical implications of the issue As such it will be of great interest to scholars of Theology Biblical Studies and Church Growth Leadership as well as Organisational Behaviour Business Management and Psychology

Composition of the Pentateuch L. S. Baker Jr.,Kenneth Bergland,Felipe A. Masotti,A. Rahel Wells,2020-12-11 For many years the historical critical quest for a reconstruction of the origin s and development of the Pentateuch or Hexateuch has been dominated by the documentary hypothesis the heuristic power of which has produced a consensus so strong that an interpreter who did not operate within its framework was hardly regarded as a scholar However the relentless march of research on this topic has continued to yield new and refined analyses data methodological tools and criticism In this spirit the contributions to this volume investigate new ideas about the composition of the Pentateuch arising from careful analysis of the biblical text against its ancient Near Eastern background Covering a wide spectrum of topics and diverging perspectives the chapters in this book are grouped into two parts The first is primarily concerned with the history of scholarship and alternative approaches to the development of the Pentateuch The second focuses on the exegesis of particular texts relevant to the composition of the Torah The aim of the project is to foster investigation and collegial dialogue in a spirit of humility and frankness without imposing uniformity In addition to the editors the contributors include Tiago Arrais Richard E Averbeck John S Bergsma Joshua A Berman Daniel I Block Richard Davidson Roy E Gane Duane A Garrett Richard S Hess Benjamin Kilch r Michael LeFebvre Ji Moskala and Christian Vogel
