

Adaptive Web-based Systems: From Framework to Implementation

Bujar Raufi, Juliana Georgieva

Abstract: *The paper gives an insight of the work done so far in modeling and implementation of user adapted software systems or adaptive web sites. We introduce a five layer framework which gives to our adaptive web based system flexibility, expressiveness, modularity and interoperability. The work so far has been concentrated in the first four layers of the framework concerning data representation, representation of knowledge as well as development of adaptation algorithm for such systems. Initial experimental results on adaptation show good performance of the algorithm for both per-user based adaptation and adaptation for groups of users. The findings also indicate that the approach is suitable for generic adaptive web-based systems.*

Keywords: *Adaptive web based systems, adaptive hypermedia, user adapted software systems.*

INTRODUCTION

Many of the traditional web pages used today suffer from a problem of representing the same set of data to each particular user [1]. This means that when a user accesses a web page of a library, it will be presented with the same set of information every time it visits it. A tourist that tries to find information about travel and hotel arrangements will be presented with the same order of information regardless of its destination preferences or browsing habits [1]. The same issue can be generalized for many, but not all, web applications in various domains like: e-commerce, corporate web sites and virtual education. The solution for overcoming this situation is the development of user-adaptive software systems [1] or *Adaptive Web Sites*. Adaptive Web Sites represent Web-Based Systems that tend to arrange their content, structure or both based on user access preferences.

Starting as a pioneering work of a few research communities in the middle of 90's [2] today it represents a research milestone for many communities involving various research disciplines like: user modelling, Web Usage Mining, natural language processing, intelligent tutoring systems, cognitive sciences and semantic web. The adaptation process in adaptive web based systems is done by building a model of goals, knowledge and preferences as well as using those for interaction with the user during its browsing. In traditional adaptive web based systems such an interaction is done by building a user model and applying the same for adapting the content for the purpose of the user itself [3]. This relationship between system, user and adaptation is presented by Brusilovsky in the form of user modelling-adaptation loop [3]. In this approach, the system collects data about user, processes the same and finally results are presented in an adapted way. The adaptation process, as stated by Brusilovsky, is performed through the adaptation methods and adaptation techniques [3].

By *adaptation methods* we consider a more generalized and abstracted approach concerning adaptation process. This usually represents a description of what the adaptation should do rather than how to do it. Methods usually include a more abstracted representation of adaptation rules like inserting a certain fragment in some part of the page if some conditions are met etc. By *adaptation technique* on the other hand, we consider a more detailed and well specified approach for delivering adaptation and consequently, as such, they are a part of the implementation process. Each adaptation technique is characterized by specific knowledge representation, modelling, adaptation engine etc [3].

Adaptive Web Based Systems From Conception To Implementation Introduction

In today's digital age, the availability of Adaptive Web Based Systems From Conception To Implementation books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Adaptive Web Based Systems From Conception To Implementation books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Adaptive Web Based Systems From Conception To Implementation books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Adaptive Web Based Systems From Conception To Implementation versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, Adaptive Web Based Systems From Conception To Implementation books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Adaptive Web Based Systems From Conception To Implementation books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another

popular platform for Adaptive Web Based Systems From Conception To Implementation books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Adaptive Web Based Systems From Conception To Implementation books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement.
