Chemical Abstracts, 1920 **Adaptive Computing in Design and Manufacture VI** Ian Parmee, 2004-05-11 The Adaptive Computing in Design and Manufacture conference series has become a well established largely application oriented meeting recognised by several UK Engineering Institutions and the International Society of Genetic and Evolutionary

Computing The main theme of the series relates to the integration of evolutionary and adaptive computing technologies with design and manufacturing processes whilst also taking into account complementary advanced computing technologies Evolutionary and adaptive computing techniques continue to increase their penetration of industrial and commercial practice as awareness of their powerful search exploration and optimisation capabilities becomes ever more prevalent and increasing desk top computational capability renders stochastic population based search a far more viable proposition There has been a significant increase in the development and integration of commercial software tools utilising adaptive computing technologies and the emergence of related commercial research and consultancy organisations supporting the introduction of best practice in terms of industrial utilisation The book is comprised of selected papers that cover a diverse set of industrial application areas including engineering design and design environments and manufacturing process design scheduling and control Various aspects of search exploration and optimisation are investigated in the context of integration with industrial processes including multi objective and constraint satisfaction development and utilization of meta models algorithm and strategy development and human centric evolutionary approaches The role of agent based and neural net technologies in terms of supporting search processes and providing an alternative simulation environment is also explored This collection of papers will be of particular interest to both industrial researchers and practitioners in addition to the academic research communities across engineering operational research and computer science *AF Manual United States.
