GENERAL INFORMATION

The 6128, 6137, 6137R, 6138, 6139, and 6139R Remote Keypads are keypad addressable (no DIP switches), and are intended for use with the controls listed in the table above. They can be set for the non-addressable operation (address 31) if required by the control with which they are used.

Note: The 6137R and 6139R have red bezels instead of gray. Otherwise, they are exactly the same as the 6137 and 6139, respectively.

The 6128 and 6137 are fixed-word keypads that provide a two-digit display for zone identification, and a set of predesignated English language prompts (e.g., ALARM, AWAY, STAY, CHECK, etc.) for indicating the system's status.

The 6138 is a one-line alpha keypad that displays a 2-line message one line at a time. To display the second line of information, press the [#] key. Press the [#] key again to return to the first line of information. The display automatically returns to the first line of information if no key is pressed for three seconds.

Note: After pressing the [#] key to view the second line or return to the first line, wait at least three seconds before entering a control panel command (e.g., arm the system).

The 6139 is a two-line alpha keypad equipped with a programmable 2-line, 32-character (16 characters per line) English language display for complete zone identification (if descriptors are programmed), plus system status.

The keys on the keypads are located behind a decorative door, and are continuously backlit for convenience. The inside of the decorative door has space for a zone ID label (supplied) on which the installer can write descriptions of each zone for handy user reference.

All keypads allow panic alarm activation (if enabled in control programming). For the 6128, panic alarms are activated by pressing key pairs [1] & [★], [★] & [8], and [3] & [8].

The 6137/6137R, 6138, and 6139/6139R are equipped with dedicated single keys for panic activation — keys A, B, and C (the D key is not used as panic), which are equivalent to the [1] & [★], [★] & [8], and [3] & [8] keys, respectively.

Single panic keys (A, B, and C) must be held down for at least 2 seconds to activate an alarm.

A set of adhesive-backed labels with some typical panic symbols (i.e., fire, police, personal emergency, etc.) is provided. These labels can be placed on or next to the keys to identify each key's function for the end user (as determined by the control panel's capability and programming; see the control's instructions).

WIRING AND INSTALLATION

The keypads can be surface mounted directly to a wall, or to a single- or double-gang electrical box. For flush mounting the 6138 and 6139/6139R to drywall, use the optional 6139TRK Flush Mount Kit (6128 & 6137/6137R cannot be flush mounted).
