Adapting Institutions Governance Complexity And Social Ecological Resilience:

Adapting Institutions Emily Boyd, Carl Folke, 2011-10-27 Global environmental change is occurring at a rate faster than humans have ever experienced. Climate change and the loss of ecosystem services are the two main global environmental crises facing us today. As a result, there is a need for better understanding of the specific and general resilience of networked ecosystems, cities, organisations, and institutions to cope with change. In this book, an international team of experts provide cutting edge insights into building the resilience and adaptive governance of complex social ecological systems. Through a set of case studies, it focuses on the social science dimension of ecosystem management in the context of global change, in a move to bridge existing gaps between resilience, sustainability, and social science. Using empirical examples ranging from local to global levels, views from a variety of disciplines are integrated to provide an essential resource for scholars, policy makers, and students seeking innovative approaches to governance.

Adapting Institutions Emily Boyd, Carl Folke, 2014-05-14 Presents cutting edge insights into adapting institutions that build social ecological resilience to complex multi scale environmental change.

Handbook on Adaptive Governance Sirkku Juhola, 2023-02-14 The interconnectedness of global society is increasingly visible through crises such as the current global health pandemic, emerging climate change impacts, and increasing erosion of biodiversity. This timely Handbook navigates the challenges of adaptive governance in these complex contexts, stressing the necessarily compounded nature of bio-physical and social systems to ensure more desirable governance outcomes.

Hybrid Threats and Grey Zone Conflict Mitt Regan, Aurel Sari, 2024 Hybrid Threats and Grey Zone Conflict explores the legal dimension of strategic competition below the threshold of war, assessing the key legal and ethical questions posed for liberal democracies. Bringing together diverse scholarly and practitioner perspectives, the volume introduces readers to the conceptual and practical difficulties arising in this area, the rich debates the topic has generated, and the challenges that countering hybrid threats and grey zone conflict poses for liberal democracies.

Ecological Governance Olivia Woolley, 2014-11-06 Ecological degradation has been an object of concern for the international community since the early 1970s, but legal approaches that have been employed to improve the protection of ecosystems have failed to halt this decline. Ecological Governance explores how the law should respond to this rapid global deterioration of ecosystems by examining the foundational scientific and ethical considerations for designing laws that are effective for ecological protection. Based on these analyses, it argues that developed states should prioritise the reduction of the ecological stresses for which they are responsible in decision making on their future courses. The author also proposes structures for governance and associated legal frameworks that would enable the formulation and implementation of policies for ecological sustainability.

Principles for Building Resilience Reinette Biggs, Maja Schlüter, Michael L. Schoon, 2015-04-02 As both the societies and the world in which we live face increasingly rapid and turbulent changes, the concept of resilience has become an active and important research area. Reflecting the very latest research, this book provides a critical review of the

ways in which resilience of social ecological systems and the ecosystem services they provide can be enhanced With contributions from leaders in the field the chapters are structured around seven key principles for building resilience maintain diversity and redundancy manage connectivity manage slow variables and feedbacks foster complex adaptive systems thinking encourage learning broaden participation and promote polycentric governance The authors assess the evidence in support of these principles discussing their practical application and outlining further research needs Intended for researchers practitioners and graduate students this is an ideal resource for anyone working in resilience science and for those in the broader fields of sustainability science environmental management and governance **Governmentality after**

Neoliberalism Mark Bevir, 2018-10-24 Neoliberalism has had a major impact on public policy but it has also perhaps obscured the equally dramatic spread of other policy tools based on significantly different forms of social science This book therefore explores the mixture of social technologies that have arisen since neoliberalism sometimes alongside and sometimes in conflict with it but generally as attempts to address problems created by the market reforms of a high neoliberalism These have included attempts to spread networks joining up and long term partnerships and to build state capacity social capital and resilient communities Thematically each chapter is defined by its engagement with governmentality specifically challenging governmentality theory to pay more attention to practices The book also develops a complex and variegated account of neoliberalism and its afterlife as chapters highlight the different ways in which a range of market mechanisms and other technologies now coexist in different policy areas Finally the book moves beyond abstract discussions of both governmentality and neoliberalism to concrete demonstrations of this approach in action This text will be of key interest to scholars and students of governance public policy governmentality theory and more broadly to British Politics social policy and sociology **Marketing In and For a Sustainable Society** Naresh K. Malhotra, 2016-07-05 This special issue featuring contributions from top scholars including former editors of top journals in marketing will assemble a set of current comprehensive review articles written by distinguished experts on the state of the art of marketing research and future prospects in the transition towards sustainable society

European Wood-pastures in Transition Tibor Hartel, Tobias Plieninger, 2014-06-27 Wood pastures are important elements of European cultural identity and have an exceptional ecological value yet they are in decline all over Europe The structure of wood pastures is strongly influenced by grazing and multiple other land uses and by local and regional environmental conditions This book examines the diverse expressions of wood pastures across Europe It provides a new perspective using a social ecological framework to explore social and ecological values governing institutions threats and conservation approaches It explores the major drivers of decline which are shown to be related to accelerated cultural institutional and developmental changes occurring across Europe over the past century Case studies are included from North Western Southern and Eastern Europe Written by renowned scholars and conservationists the book contributes to developing better locally adapted conservation policies and

management approaches for wood pastures

Rethinking the Green State Karin Bäckstrand, Annica Kronsell, 2015-06-12

This innovative book is one of the first to conduct a systematic comprehensive analysis of the ideals and practices of the evolving green state. It draws on elements of political theory, feminist theory, post-structuralism, governance, and institutional theory to conceptualise the green state and advances thinking on how to understand its emergence in the context of climate and sustainability transitions. Focusing on the state as an actor in environmental, climate, and sustainability politics, the book explores different principles guiding the emergence of the green state and examines the performance of states and institutional responses to the sustainable and climate transitions in the European and Nordic context, in particular. The book's unique focus on the Nordic countries underlines the important to learn from Nordics which are perceived to be in the forefront of climate and sustainability governance as well as historically strong welfare states. With chapter contributions from leading international scholars in political science, sociology, economics, energy, and environmental systems and climate policy studies, this book will be of great value to postgraduate students and researchers working on sustainability transitions, environmental politics and governance, and those with an area studies focus on the Nordic countries.
