Addiction A Disorder Of Choice:

Addiction Gene M. Heyman,2009-10-15 In a book sure to inspire controversy Gene Heyman argues that conventional wisdom about addiction that it is a disease a compulsion beyond conscious control is wrong At the heart of Heyman s analysis is a startling view of choice and motivation that applies to all choices not just the choice to use drugs **Addiction and Choice** Nick Heather,Gabriel Segal,2017 Views on addiction are often polarised either addiction is a matter of choice or addicts simply can t help themselves But perhaps addiction falls between the two This book contains views from philosophy neuroscience psychiatry psychology and the law exploring this middle ground between free choice and no choice

Addiction and Choice Nick Heather,Gabriel Segal,2016-09-22 The central problem in the study of addiction is to explain why people repeatedly behave in ways they know are bad for them For much of the previous century and until the present day the majority of scientific and medical attempts to solve this problem were couched in terms of involuntary behavior if people behave in ways they do not want then this must be because the behavior is beyond their control and outside the realm of choice An opposing tradition which finds current support among scientists and scholars as well as members of the general public is that so called addictive behavior reflects an ordinary choice just like any other and that the concept of addiction is a myth The editors and authors of this book tend to take neither view There has been an increasing recognition in recent literature on addiction that restricting possible conceptions of it to either of these extreme positions is unhelpful and is retarding progress on understanding the nature of addiction and what could be done about it This book contains a range of views from philosophy neuroscience psychiatry psychology and the law on what exactly this middle ground between free choice and no choice consists of and what its implications are for theory practice and policy on addiction The result amounts to a profound change in our thinking on addiction and how its devastating consequences can be ameliorated **Addiction and Choice** is a thought provoking new volume for all those with an interest in this global issue

What Is Addiction? Don Ross,2010 The image of the addict in popular culture combines victimhood and moral failure we sympathize with addicts in films and novels because of their suffering and their hard won knowledge And yet actual scientific knowledge about addiction tends to undermine this cultural construct In **What Is Addiction** leading addiction researchers from neuroscience psychology genetics philosophy economics and other fields survey the latest findings in addiction science They discuss such questions as whether addiction is one kind of condition or several if addiction is neurophysiological psychological or social or incorporates aspects of all of these to what extent addicts are responsible for their problems and how this affects health and regulatory policies and whether addiction is determined by inheritance or environment or both Book Jacket *The Routledge Handbook of Philosophy and Science of Addiction* Hanna Pickard,Serge Ahmed,2018-06-13 The problem of addiction is one of the major challenges and controversies confronting medicine and society It also poses important and complex philosophical and scientific problems What is addiction Why does it occur And

how should we respond to it as individuals and as a society The Routledge Handbook of Philosophy and Science of Addiction is an outstanding reference source to the key topics problems and debates in this exciting subject It spans several disciplines and is the first collection of its kind Organised into three clear parts forty five chapters by a team of international contributors examine key areas including the meaning of addiction to individuals conceptions of addiction varieties and taxonomies of addiction methods and models of addiction evolution and addiction history sociology and anthropology population distribution and epidemiology developmental processes vulnerabilities and resilience psychological and neural mechanisms prevention treatment and spontaneous recovery public health and the ethics of care social justice law and policy Essential reading for students and researchers in addiction research and in philosophy particularly philosophy of mind and psychology and ethics The Routledge Handbook of Philosophy and Science of Addiction will also be of great interest to those in related fields such as medicine mental health social work and social policy

Alternative Models of Addiction Hanna Pickard,Serge H. Ahmed,Bennett Foddy,2015-12-07 For much of the 20th century theories of addictive behaviour and motivation were polarized between two models The first model viewed addiction as a moral failure for which addicts are rightly held responsible and judged accordingly The second model in contrast viewed addiction as a specific brain disease caused by neurobiological adaptations occurring in response to chronic drug or alcohol use and over which addicts have no choice or control As our capacity to observe neurobiological phenomena improved the second model became scientific orthodoxy increasingly dominating addiction research and informing public understandings of addiction More recently however a dissenting view has emerged within addiction research based partly on new scientific research and partly

on progress in philosophical and psychological understandings of relevant mental phenomena This view does not revert to treating addiction as a moral failure but nonetheless holds that addictive behaviour is fundamentally motivated by choice and subject to at least a degree of voluntary control On this alternative model of addiction addictive behaviour is an instrumental means to ends that are desired by the individual although much controversy exists with respect to the rationality or irrationality of these ends the degree and nature of the voluntary control of addictive behaviour and motivation the explanation of the difference between addictive and non addictive behaviour and motivation and lastly the extent to which addictive behaviour and motivation is correctly characterised as pathological or diseased This research topic includes papers in the traditions of neuroscience psychology philosophy law and social science that explore alternative understandings of addiction
