

Honeywell

ADEMCO 4100SM Serial Interface Module

INSTALLATION AND SETUP GUIDE

GENERAL INFORMATION

The 4100SM Serial Interface Module can be used as any of the following:

- A direct-wire downloading device that is used in conjunction with the Compass downloading software to program compatible control panels without having to use a modem or telephone line. This is done by either connecting the 4100SM to the serial port of a PC or to a GSM communicating unit.
- An interface device that is used to connect a serial printer or a PC using the Honeywell Navigator Reporter software to control panels that feature event logging with printer output capabilities.
- An interface device that is used to connect a control panel to 3rd party Home/Facility Automation hardware and software.

The downloading function is applicable in UL listed installations only when someone is present at the site while the downloading. However, the 4100SM is UL Listed for use as an interface to an event logging printer.

The 4100SM is packaged with everything that is needed to connect the RS-232 serial port of most IBM-compatible fixed or portable PCs to the control panel. This includes:

- 1.5-foot alligator clip leads (4)
- 4142TR voltage trigger cable (9 pos.)
- 10-foot DB25 male to DB25 female RS-232 serial cable
- DB25 female to DB25 female RS-232 gender changer
- DB25 male to DB25 female null modem adapter
- DB25 female to DB9 female adapter
- Bracket and insulator

Important: Check your control panel's installation instructions to verify that your software supports the feature and any programming options that may need to be set for proper operation. Also, verify that you have downloading software that supports direct-wire downloading for the control panel you are programming.

INSTALLATION AND OPERATION INSTRUCTIONS

Direct-Wire Downloading Connections to a PC

Direct-wire downloading can be accomplished either by connecting the 4100SM to the serial port of a PC or to the programmer port of an IP or GSM type module.

Connections to a PC

Direct-wire downloading connections are made to a header on the control panel's circuit board via the supplied 4142TR voltage trigger cable.

As shown in Figures 1 and 2, terminals 3, 6, 7, and 8 on the 4100SM are used. The three colored terminals (red, blue, and white) must be left uncut for direct-wire downloading applications. Most IBM-compatible PCs have two RS-232 serial ports (COM1 and COM2).

You must decide which serial port you want to use, and then determine which type of connector (DB25 female, DB25 male, DB9 male, or USB) is provided for that port.

Refer to the following table for instructions on how to connect each type of PC connector.

Type of PC Connector	Connection Instructions
DB25 female connector	Use the RS-232 cable to make connections between the serial module and the PC serial port.
DB25 male connector	Use the RS-232 cable and gender changer to make connections.
DB9 male connector	Use the RS-232 cable and DB9/DB25 adapter to make connections.
USB Port	Use a USB to serial converter to make connections.

NULL MODEM NOTE: The 4100SM requires that your PC have a DTE pinout in order to communicate properly. Check the documentation supplied with your PC to determine if the connector for the serial port you have chosen has a DTE pinout (meaning that your PC transmits data on pin 2 and receives data on pin 3) or a DCE pinout (meaning that your PC transmits data on pin 3 and receives data on pin 2). If your PC connector has a DCE pinout, you must attach the supplied null modem adapter to the RS-232 cable to ensure proper pin connections.

If you are not sure whether your serial port is DTE or DCE, assume that it is DTE. If a problem occurs, refer to the "In Case of Difficulty" section of this document.
