The second edition of this landmark book offers the same practical guidance and is designed to meet ever increasing demands for improvement and accountability. This edition includes expanded coverage of vital assessment topics such as promoting an assessment culture, characteristics of good assessment audiences, for assessment organizing and coordinating assessment, assessing attitudes and values, setting benchmarks and standards, and using results to inform and improve teaching, learning, planning, and decision making.

Assessing Student Learning Linda Suskie, 2018-01-09 *Assessing Student Learning* is a standard reference for college faculty and administrators, and the third edition of this highly regarded book continues to offer comprehensive, practical, plainspoken guidance. The third edition adds a stronger emphasis on making assessment useful, greater attention to building a culture in which assessment is used to inform important decisions, an enhanced focus on the many settings of assessment, especially general education and co-curricula, a new emphasis on synthesizing evidence of student learning into an overall picture of an integrated learning experience, new chapters on curriculum design and assessing the hard-to-assess, more thorough information on organizing assessment processes, new frameworks for rubric design and setting standards and targets, and many new resources. Faculty, administrators, new and experienced assessment practitioners, and students in graduate courses on higher education assessment will all find this a valuable addition to their bookshelves.

Higher Education Outcomes Assessment for the Twenty-First Century Peter Hernon, Robert E. Dugan, Candy Schwartz, 2013-05-09 This book discusses recent trends in outcomes assessment, examines how state governments are reshaping the national discussion with higher education, and explains how libraries must respond to these changes. *Higher Education Outcomes Assessment for the Twenty-First Century* focuses on recent developments in outcomes assessment, especially from the perspectives of the federal government and state governments, as well as foundations concerned about the state of higher education. The authors identify the significant changes that these stakeholders call for, information that academic librarians and anyone following outcomes assessment need to be aware of, and interpret the discussions to identify implications for libraries. Building upon the foundation of knowledge presented in the previous two *Libraries Unlimited Outcomes Assessment in Higher Education* titles, this book provides readers with up-to-date coverage of topics such as the emerging metrics used to define student and institutional success, the increased importance of accountability, and the need to compare and assess the performance of programs and institutions rather than individual courses, and the shift in prioritizing student outcomes over student learning outcomes. The authors also spotlight the critical need for libraries to fit their role within the national discussion and suggest ways in which library managers and directors can play a role in redirecting the discussion to their benefit.
