Applied Ordinal Logistic Regression Using Stata From Single Level To Multilevel Modeling:

Applied Ordinal Logistic Regression Using Stata Xing Liu, 2016 The first book to provide a unified framework for both single level and multilevel modeling of ordinal categorical data Applied Ordinal Logistic Regression Using Stata helps readers learn how to conduct analyses interpret the results from Stata output and present those results in scholarly writing Using step by step instructions this non technical applied book leads students applied researchers and practitioners to a deeper understanding of statistical concepts by closely connecting the underlying theories of models with the application of real world data using statistical software

Applied Ordinal Logistic Regression Using Stata Xing Liu, 2015-09-30 The first book to provide a unified framework for both single level and multilevel modeling of ordinal categorical data Applied Ordinal Logistic Regression Using Stata by Xing Liu helps readers learn how to conduct analyses interpret the results from Stata output and present those results in scholarly writing Using step by step instructions this non technical applied book leads students applied researchers and practitioners to a deeper understanding of statistical concepts by closely connecting the underlying theories of models with the application of real world data using statistical software

Categorical Data Analysis and Multilevel Modeling Using R Xing Liu, 2022-02-24 Categorical Data Analysis and Multilevel Modeling Using R provides a practical guide to regression techniques for analyzing binary ordinal nominal and count response variables using the R software Author Xing Liu offers a unified framework for both single level and multilevel modeling of categorical and count response variables with both frequentist and Bayesian approaches Each chapter demonstrates how to conduct the analysis using R how to interpret the models and how to present the results for publication A companion website for this book contains datasets and R commands used in the book for students and solutions for the end of chapter exercises on the instructor site

Statistical Methods for Experimental Research in Education and Psychology Jimmie Leppink, 2019-05-30 This book focuses on experimental research in two disciplines that have a lot of common ground in terms of theory experimental designs used and methods for the analysis of experimental research data education and psychology Although the methods covered in this book are also frequently used in many other disciplines including sociology and medicine the examples in this book come from contemporary research topics in education and psychology Various statistical packages commercial and zero cost Open Source ones are used The goal of this book is neither to cover all possible statistical methods out there nor to focus on a particular statistical software package There are many excellent statistics textbooks on the market that present both basic and advanced concepts at an introductory level and or provide a very detailed overview of options in a particular statistical software programme This is not yet another book in that genre Core theme of this book is a heuristic called the question design analysis bridge there is a bridge connecting research questions and hypotheses experimental design and sampling procedures and common statistical methods in that context Each statistical method is discussed in a concrete context of a set of research question with directed one sided or undirected two sided hypotheses and

an experimental setup in line with these questions and hypotheses Therefore the titles of the chapters in this book do not include any names of statistical methods such as analysis of variance or analysis of covariance In a total of seventeen chapters this book covers a wide range of topics of research questions that call for experimental designs and statistical methods fairly basic or more advanced

The Art of Modelling the Learning Process Jimmie Leppink, 2020-04-06 By uniting key concepts and methods from education psychology statistics econometrics medicine language and forensic science this textbook provides an interdisciplinary methodological approach to study human learning processes longitudinally This longitudinal approach can help to acquire a better understanding of learning processes can inform both future learning and the revision of educational content and formats and may help to foster self regulated learning skills The initial section of this textbook focuses on different types of research questions as well as practice driven questions that may refer to groups or to individual learners This is followed by a discussion of different types of outcome variables in educational research and practice such as pass fail and other dichotomies multi category nominal choices ordered performance categories and different types of quantifiable i e interval or ratio level of measurement variables For each of these types of outcome variables single measurement and repeated measurements scenarios are offered with clear examples The book then introduces cross sectional and longitudinal interdependence of learning related variables through emerging network analytic methods and in the final part the learned concepts are applied to different types of studies involving time series The book concludes with some general guidelines to give direction to future united educational research and practice This textbook is a must have for all applied researchers teachers and practitioners interested in the teaching of human learning instructional design assessment life long learning or applications of concepts and methods commonly encountered in fields such as econometrics psychology and sociology to educational research and practice

Mass Shootings in Central and Eastern Europe Alexei Anisin, 2021-11-17 This book examines mass shootings and attempted shootings that occurred across 16 countries in Central and Eastern Europe known as post communist states This region of the world has been described by social scientists as possessing specific social cultural and political characteristics which may mean that mass shootings in this part of the world are driven by distinct causal factors in comparison to those in North America and elsewhere This book explores trends and patterns that underpin cases in this under explored region and tests whether Cumulative Strain Theory can account for mass shooting occurrences It uses in depth qualitative analysis to examine select case studies in one chapter followed by a chapter which uses

quantitative methods to identify trends across a wider set of cases and to test the theoretically driven hypotheses This data is then compared with data in the US This book draws on a wide range of media forensic and court reports and provides methodological insights and discussions of future trends including the potential incidental increase of mass shootings in these regions It also engages in recent public policy debates pertaining to firearm ownership and regulation **Portfolio**

Decisions for Faith-Based Investors Zaheer Anwer,2021-02-08 This book examines the idiosyncratic risk risk return trade off and payout decisions for faith based investors including Islamic Shariah compliant and ethical investors who may be paying a cost for their belief system in the form of under diversification of portfolios and additional monitoring costs owing to their unique risk profile There is a growing number of investors who are motivated by social environmental and ethical considerations in their investment decisions They apply a set of investment screens to include or exclude assets based on ecological social corporate governance or ethical criteria This socially responsible investment SRI ethical investment or sustainable investment style is prevalent since religious or ethical values matter to investors even if the risk adjusted returns are lower than those of conventional investments The author addresses these issues for Islamic and socially responsible portfolios in detail by using proprietary data of Dow Jones Indices from the United States The findings are a unique and valuable addition to the existing corporate finance portfolio management and Islamic finance literature Shaping Writing

Grades Lee McCallum,Philip Durrant,2022-09-08 This Element explores relationships between collocations writing quality and learner and contextual variables in a first year composition FYC programme Comprising three studies the Element is anchored in understanding phraseological complexity and its sub constructs of sophistication and diversity First the authors look at sophistication through association measures They tap into how these measures may tell us different types of information about collocation via a cluster analysis Selected measures from this clustering are used in a cumulative links model to establish relationships between these measures measures of diversity and measures of task the language background of the writer and individual writer variation and writing quality scores A third qualitative study of the statistically significant predictors helps understand how writers use collocations and why they might be favoured or downgraded by raters This Element concludes by considering the implications of this modelling for assessment **The Law of Riba in**

Islamic Banking Hasan Gürak,Neelambar Hatti,2024-03-12 The issue of riba that is interest the excess or surplus on loans is crucial for both Islamic and non Islamic countries Western economic systems use interest to distribute financial resources efficiently for investment and or consumption while Islamic economies pursue a completely different strategy for financing loans which adheres to Islamic laws and prohibits the activities of conventional banking systems with regard to interest This book argues that there is scope for new definitions and analysis based on alternative concepts which respect Islamic values and principles yet pave the way for modification and debate The book comprises of two parts Theoretical issues are dealt with in the first section The first two chapters examine conventional Islamic views on the prohibition of riba while Chapters 3

and 4 contain unprecedented and alternative theoretical analysis based on concepts such as earned halal permitted legal vs unearned haram impermissible illegal income and SUKUK that is Islamic interest free bonds The second part of the book tackles another unconventional aspect of Islamic finance that is the concept of NAS The book considers whether the NAS influenced anti inflationary interest policy was a success or failure Empirical data is evaluated in terms of bank incomes inflation rate interest rate and the distribution of income This book will be a useful guide for students scholars and researchers of Islamic banking and finance
