

Features

Individual addressable manual fire alarm stations

- Power and data supplied by MX Technology addressable loop communications using a single wire pair
- EMI compatibility
- Installation location of the pull stations are identified by activating the on-board Reed Switch
- Internally-mounted addressable module is similar to the design of the A4090-5255 Mini-LAM
- Available as single action or double action breakglass operation
- Inbuilt LED to indicate communications with panel and status of contacts monitoring
- Pull lever that protrudes when alarmed
- Break-rod supplied (use is optional)
- Complying standards: UL864
- Complies with ADA requirement

Compatibility

- For use with Autocall 4100ES, 4010ES, and 4100U series fire alarm control units equipped with an MX Loop Module
- Refer to datasheet for MX Loop Module details

Compact construction

- Electronics module enclosure minimizes dust infiltration
- Mounting in standard electrical boxes
- Screw terminals for wiring connections

Tamper resistant reset key lock (keyed same as Autocall fire alarm cabinets)

Multiple mounting options:

- Surface or semi-flush with standard boxes or matching Autocall boxes
- Flush mount adapter kit
- Adapters are available for retrofitting to commonly available existing boxes

Description

MX addressable stations contain an integral addressable module that constantly monitors status and communicates with an MX Loop Module located in the host fire alarm control unit.

Operation

Activation of the A4099-5213 single action manual station requires a firm downward pull to activate the alarm switch. Completing the action breaks an internal plastic break-rod (visible below the pull lever, use is optional). The break-rod can act as a deterrent to vandalism without interfering with the minimum pull requirements needed for easy activation. The pull lever latches into the alarm position and remains extended out of the housing to provide a visible indication.

A4099-5212 double action stations (breakglass) Strike the front-mounted hammer to break the glass and expose the recessed pull lever. The pull lever then operates as a single action station.

Station reset requires the use of a key to reset the manual station lever and deactivate the alarm switch. If the break-rod is used, it must be replaced.

Station testing Pull the lever to test the station. Electrical testing is performed by unlocking the station housing to activate the alarm switch.
