Teaching and Learning in a Digital World Michael E. Auer, David Guralnick, Istvan Simonics, 2018-02-09 This book gathers the Proceedings of the 20th International Conference on Interactive Collaborative Learning ICL2017 held in Budapest Hungary on 27-29 September 2017. The authors are currently witnessing a significant transformation in the development of education. The impact of globalisation on all areas of human life, the exponential acceleration of technological developments and global markets, and the need for flexibility and agility are essential and challenging elements of this process that have to be tackled in general but especially in engineering education. To face these current real-world challenges, higher education has to find innovative ways to quickly respond to them. Since its inception in 1998, this conference has been devoted to new approaches in learning with a focus on collaborative learning. Today, the ICL conferences offer a forum for exchange concerning relevant trends and research results and for sharing practical experience gained while developing and testing elements of new technologies and pedagogies in the learning context.

New Trends in Educational Activity in the Field of Mechanism and Machine Theory Juan Carlos García-Prada, Cristina Castejón, 2013-10-12 The First International Symposium on the Education in Mechanism and Machine Science ISEMMS 2013 aimed to create a stable platform for the interchange of experience among researchers of mechanism and machine science. Topics treated include contributions on subjects such as new trends and experiences in mechanical engineering education, mechanism and machine science in mechanical engineering curricula, MMS in engineering programs such as, for example, methodology, virtual labs, and new laws. All papers have been rigorously reviewed and represent the state of the art in their field.
