Research Analytics Francisco J. Cantu-Ortiz, 2017-10-25 The growth of machines and users of the Internet has led to the proliferation of all sorts of data concerning individuals institutions companies governments universities and all kinds of known objects and events happening everywhere in daily life Scientific knowledge is not an exception to the data boom The phenomenon of data growth in science pushes forth as the number of scientific papers published doubles every 9 15 years and the need for methods and tools to understand what is reported in scientific literature becomes evident As the number of academicians and innovators swells so do the number of publications of all types yielding outlets of documents and depots of authors and institutions that need to be found in Bibliometric databases These databases are dug into and treated to hand over metrics of research performance by means of Scientometrics that analyze the toil of individuals institutions journals countries and even regions of the world The objective of this book is to assist students professors university managers government industry and stakeholders in general understand which are the main Bibliometric databases what are the key research indicators and who are the main players in university rankings and the methodologies and approaches that they employ in producing ranking tables The book is divided into two sections The first looks at Scientometric databases including Scopus and Google Scholar as well as institutional repositories The second section examines the application of Scientometrics to world class universities and the role that Scientometrics can play in competition among them It looks at university rankings and the methodologies used to create these rankings Individual chapters examine specific rankings that include QS World University Scimago Institutions Webometrics U Multirank U S News World Report The book concludes with a discussion of university performance in the age of research analytics

Searchial Marketing Alan Glazier, 2011 The buzz surrounding social media focuses on how business can build relationships by participating in the online conversation When it works social media relationship building is often labor and time intensive with a return on investment that is often

hard to measure Not many people understand that social media campaigns can be orchestrated to build relationships and drive in new business at a much greater rate than using the relationship aspect of social media alone provides When I discovered this relationship building became the least compelling part of the picture Searchial is a phrase I created to describe the method of interacting within the strange new world of social media while elevating your profile in internet searches for the products and services you offer This book teaches do it yourself methods of implementing a searchial media campaign It demonstrates the added value of practicing searchial media instead of just social media Social tools have the power to drive new business into your organization not only through communicating and relationship building but by coincidentally causing your listing in search engines to rank higher in searches for keywords and key phrases people are using to find the products and services you offer in a specific geographical area or worldwide The term Searchial reflects the realization that my time and effort were best spent driving new patients into my medical practice using social tools to improve our position in Google Bing and other search engines not just building and strengthening existing relationships This book can be applied to and used as a guide within any industry at any stage of the new media marketing game Appendices contain information specific to social media and search elevation in the medical profession specifically small medical business hospital and clinic and pharmaceutical companies
