Biological Data Mining Chapman Hallcrc Data Mining And Knowledge Discovery Series:

Biological Data Mining Jake Y. Chen,Stefano Lonardi,2009-09-01 Like a data guzzling turbo engine advanced data mining has been powering post genome biological studies for two decades Reflecting this growth Biological Data Mining presents comprehensive data mining concepts theories and applications in current biological and medical research Each chapter is written by a distinguished team of interdisciplin **Music Data Mining** Tao Li,Mitsunori Ogiwara,George Tzanetakis,2011-07-12 The research area of music information retrieval has gradually evolved to address the challenges of effectively accessing and interacting large collections of music and associated data such as styles artists lyrics and reviews Bringing together an interdisciplinary array of top researchers Music Data Mining presents a variety of approaches to successfully employ data mining techniques for the purpose of music processing The book first covers music data mining tasks and algorithms and audio feature extraction providing a framework for subsequent chapters With a focus on data classification it then describes a computational approach inspired by human auditory perception and examines instrument recognition the effects of music on moods and emotions and the connections between power laws and music aesthetics Given the importance of social aspects in understanding music the text addresses the use of the Web and peer to peer networks for both music data mining and evaluating music mining tasks and algorithms It also discusses indexing with tags and explains how data can be collected using online human computation games The final chapters offer a balanced exploration of hit song science as well as a look at symbolic musicology and data mining The multifaceted nature of music information often requires algorithms and systems using sophisticated signal processing and machine learning techniques to better extract useful information An excellent introduction to the field this volume presents state of the art techniques in music data mining and information retrieval to create novel ways of interacting with large music collections **Data Mining** Richard J. Roiger,2017-01-06 Data Mining A Tutorial Based Primer Second Edition provides a comprehensive introduction to data mining with a focus on model building and testing as well as on interpreting and validating results The text guides students to understand how data mining can be employed to solve real problems and recognize whether a data mining solution is a feasible alternative for a specific problem Fundamental data mining strategies techniques and evaluation methods are presented and implemented with the help of two well known software tools Several new topics have been added to the second edition including an introduction to Big Data and data analytics ROC curves Pareto lift charts methods for handling large sized streaming and imbalanced data support vector machines and extended coverage of textual data mining The second edition contains tutorials for attribute selection dealing with imbalanced data outlier analysis time series analysis mining textual data and more The text provides in depth coverage of RapidMiner Studio and Weka s Explorer interface Both software tools are used for stepping students through the tutorials depicting the knowledge discovery process This allows the reader maximum flexibility for their hands on data mining experience *Handbook of Educational Data Mining* Cristobal

Romero, Sebastian Ventura, Mykola Pechenizkiy, Ryan S.J.d. Baker, 2010-10-25 This handbook provides a thorough overview of the current state of knowledge in this area The first part of the book includes nine surveys and tutorials on the principal data mining techniques that have been applied in education The second part presents a set of 25 case studies that give a rich overview of the problems that EDM has addressed With contributions by well known researchers from a variety of fields the book reflects the multidisciplinary nature of the EDM community It helps education experts understand what types of questions EDM can address and helps data miners understand what types of questions are important to educational design and educational decision making

Contrast Data Mining Guozhu Dong, James Bailey, 2016-04-19 A Fruitful Field for Researching Data Mining Methodology and for Solving Real Life Problems Contrast Data Mining Concepts Algorithms and Applications collects recent results from this specialized area of data mining that have previously been scattered in the literature making them more accessible to researchers and developers in data mining and

Innovations in Bio-Inspired Computing and Applications Ajith Abraham, Mrutyunjaya Panda, Subhrajit Pradhan, Laura Garcia-Hernandez, Kun Ma, 2020-08-05 This book highlights recent research on bio inspired computing and its various innovative applications in information and communication technologies It presents 38 high quality papers from the 10th International Conference on Innovations in Bio Inspired Computing and Applications IBICA 2019 and 9th World Congress on Information and Communication Technologies WICT 2019 which was held at GIET University Gunupur India on December 16 18 2019 As a premier conference IBICA WICT brings together researchers engineers and practitioners whose work involves bio inspired computing computational intelligence and their applications in information security real world contexts etc Including contributions by authors from 18 countries the book offers a valuable reference guide for all researchers students and practitioners in the fields of Computer Science and Engineering

Relational Data Clustering Bo Long, Zhongfei Zhang, Philip S. Yu, 2010-05-19 A culmination of the authors years of extensive research on this topic Relational Data Clustering Models Algorithms and Applications addresses the fundamentals and applications of relational data clustering It describes theoretic models and algorithms and through examples shows how to apply these models and algorithms to solve real world problems After defining the field the book introduces different types of model formulations for relational data clustering presents various algorithms for the corresponding models and demonstrates applications of the models and algorithms through extensive experimental results The authors cover six topics of relational data clustering Clustering on bi type heterogeneous relational data Multi type heterogeneous relational data Homogeneous relational data clustering Clustering on the most general case of relational data Individual relational clustering framework Recent research on evolutionary clustering This book focuses on both practical algorithm derivation and theoretical framework construction for relational data clustering It provides a complete self contained introduction to advances in the field

Introduction to Privacy-Preserving Data Publishing Benjamin C.M. Fung, Ke Wang, Ada Wai-Chee Fu, Philip S. Yu, 2010-08-02 Gaining access

to high quality data is a vital necessity in knowledge based decision making But data in its raw form often contains sensitive information about individuals Providing solutions to this problem the methods and tools of privacy preserving data publishing enable the publication of useful information while protecting data privacy Int **Privacy-Aware Knowledge Discovery** Francesco Bonchi,Elena Ferrari,2010-12-02 Covering research at the frontier of this field Privacy Aware Knowledge Discovery Novel Applications and New Techniques presents state of the art privacy preserving data mining techniques for application domains such as medicine and social networks that face the increasing heterogeneity and complexity of new forms of data Renowned authorities *Knowledge Discovery from Data Streams* Joao Gama,2010-05-25 Since the beginning of the Internet age and the increased use of ubiquitous computing devices the large volume and continuous flow of distributed data have imposed new constraints on the design of learning algorithms Exploring how to extract knowledge structures from evolving and time changing data Knowledge Discovery from Data Streams presents a coherent overview of state of the art research in learning from data streams The book covers the fundamentals that are imperative to understanding data streams and describes important applications such as TCP IP traffic GPS data sensor networks and customer click streams It also addresses several challenges of data mining in the future when stream mining will be at the core of many applications These challenges involve designing useful and efficient data mining solutions applicable to real world problems In the appendix the author includes examples of publicly available software and online data sets This practical up to date book focuses on the new requirements of the next generation of data mining Although the concepts presented in the text are mainly about data streams they also are valid for different areas of machine learning and data mining
