This approach will result in evidence about the levels of sexually transmitted infection and the prevalence of HIV and other STDs that are more representative of the community. In addition, it is more likely to result in more accurate estimates of the prevalence of HIV and other STDs. It is important to note that the approach will also result in more accurate estimates of the prevalence of HIV and other STDs. It is important to note that the approach will also result in more accurate estimates of the prevalence of HIV and other STDs.
