Residual Stresses in Composite Materials Mahmood M. Shokrieh,2021-06-22 The residual stress is a common phenomenon in composite materials They can either add to or significantly reduce material strength Because of the increasing demand for high strength lightweight materials such as composites and their wide range of applications it is critical that the residual stresses of composite materials are understood and measured correctly The first edition of this book

consists of thirteen chapters divided into two parts. The first part reviews destructive and non-destructive testing (NDT) techniques for measuring residual stresses. There are also additional chapters on using mathematical analytical and numerical methods for the calculation of residual stresses in composite materials. These include the simulated hole drilling method, the slitting crack compliance method, measuring residual stresses in homogeneous and composite glass materials using photoelastic techniques, and modeling residual stresses in composite materials. The second part of the book discusses measuring residual stresses in different types of composites, including polymer and metal matrix composites. The addition of nanoparticles to the matrix of polymeric composites as a new technique for the reduction of residual stresses is also discussed. In the Second Edition of this book, each of the original chapters of the first edition has been fully updated, taking into account the latest research and new developments. There are also five new chapters on the theoretical and experimental studies of residual stresses in the composite integrated circuits, residual stresses in additive manufacturing of polymers and polymer matrix composites, residual stresses in metal matrix composites fabricated by additive manufacturing, the eigenstrain based method for the incremental hole drilling technique, and the estimation of residual stresses in polymer matrix composites using the digital image correlation technique. *Residual Stresses in Composite Materials, Second Edition* provides a unique and comprehensive overview of this important topic and is an invaluable reference text for both academics and professionals working in the mechanical engineering, civil engineering, aerospace, automotive, marine, and sporting industries. Presents the latest developments on theoretical and experimental studies of residual stresses in composites. Reviews destructive and non-destructive testing (NDT) techniques for measuring residual stresses. Discusses residual stresses in the polymer matrix, metal matrix, and ceramic matrix composites. Considers the addition of nanoparticles to the matrix as a new technique for reduction of residual stresses in polymeric composites. Introduces the latest advancements of research on the residual stresses in additive manufactured polymer and metal matrix composites. The 3rd International Conference on Intelligent and Interactive Computing 2021 (IIC 2021) was held virtually at Universiti Teknikal Malaysia Melaka (UTeM Melaka, Malaysia) on 9 September 2021. The event was jointly organized by the Department of Interactive Media and Department of Intelligent Computing and Analytics, Faculty of Information and Communication Technology, Universiti Teknikal Malaysia Melaka (UTeM) with the theme "Empowering the World with Intelligent and Immersive Computing towards Smart Solutions." This open access e-proceedings contains a compilation of 38 selected papers from the IIC 2021. The technical committees received a great response for submissions from various areas including computational intelligence, data analytics, robotics, and automation, multimedia, and immersive technologies, education 4.0, and others. We hope that this proceeding will serve as a valuable reference for researchers. The event has achieved its aim, which

is to gather academic scholars and industry practitioners to share valuable knowledge and expertise in related disciplines Moreover it is hoped that this conference has opened up opportunities to explore recent advancements and challenges on selected research discipline As the editors in chief we are grateful and would like to convey our sincerest gratitude to the fellow review members for their effort in reviewing the submitted papers for this proceeding We are thankful to all the authors for revising their papers according to the proceeding requirements Also we would like to express our thoughtful appreciation to the organizer of the IIC 2021
