Managing the Commons John A. Baden, Douglas S. Noonan, 2017-08-15 Managing natural resources that are held in common is a great and grave challenge. It requires addressing the community of users, beneficiaries and managers. It also requires consideration of how those communities interact with the commons itself. At stake is the prosperity and even survival of both the people and the environment. Understanding and improving how we relate to commons has been the focus of much scholarly and practical research in the last 30 years. A quick look at the various natural resource commons surrounding us indicates that this will no doubt continue. Pacific Northwest salmon fisheries represent a system of commons both complex and illustrative. My past history as administrator of the US Environmental Protection Agency and my fisherman's interest in salmon has heightened my sensitivity to the plight of the salmon and the people whose lives they affect. Recently my wife and I moved back to the Pacific Northwest something the salmon try to do every year as they live out their inspiring life cycles. Unlike us the salmon do not always find a hospitable environment when they return. There are many reasons. Simply put there are more people in the salmon's way and they struggle more with the problems that come with expanding human populations. A number of reports issued over the past few years have chronicled the broad declines and local extinction of many salmon, steelhead and sea run cutthroat stocks in the region. The people who fish for a living and the communities in which they live have been hit hard. Our resource agencies are in danger of being overwhelmed by the complexity and magnitude of the problem. Why are salmon faring so poorly? Who is responsible? What can be done to reverse the recent declines in salmon populations? When tragedy befalls a commons as it has the salmon, I come to no conclusion about who is at fault and I don't intend to. The one thing that I am certain of is that the only truly innocent parties in all of this are the salmon and the generations of people yet to come. It seems to me that the responsibility falls upon all of us, fishermen, resource managers and concerned citizens alike to take the steps necessary to ensure that salmon populations recover to the point that our children will be able to enjoy the quality of life we once took for granted. While many people focus on how to get the most from commons, groups like the Sustainable Fisheries Foundation emphasize providing and maintaining those natural resources. Their goal is deceptively simple: We are trying to put more salmon back in the rivers and lakes of the Pacific Northwest. Determining exactly how to accomplish this goal has defied the efforts of a great many dedicated and talented people. Many papers and panel discussions, especially reports on the status and trend of wild salmon populations in the North Pacific, make it clear that many salmon stocks in parts of the lower United States, southern British Columbia and the west coast of Vancouver Island are not faring well. The decline in salmon numbers in these areas corresponds with a rapidly expanding human population, alterations in land and water use, increasing sediment and containment loads and heavy fishing pressure by a combination of sport, commercial and tribal groups.

The Making of Experimental Economics Andrej Svorenčák, Harro Maas, 2015-11-05 This book is the transcript of a witness seminar on the history of experimental economics in which eleven high profile experimental economists participated including Nobel

Laureates Vernon Smith Reinhard Selten and Alvin Roth The witness seminar was constructed along four different topics skills community laboratory and funding The transcript is preceded by an introduction explaining the method of the witness seminar and its specific set up and resuming its results The participants contribution and their lively discussion provide a wealth of insights into the emergence of experimental economics as a field of research This book was awarded with best book prize of the European Society for the History of Economic Thought ESHET in 2018 *Microeconomics with Calculus* Brian R. Binger, Elizabeth Hoffman, 1988 **A Reconsideration of the Theory of Non-Linear Scale Effects** Richard G. Lipsey, 2018-03-22 The main thrust of this Element is a critical assessment of the theory and evidence concerning the sources of scale effects It is argued that the analysis of static scale effects is important because scale effects are embedding in our world and new technologies associated with an evolving economy often allow their exploitation when they cannot be exploited in less technically advanced and smaller economies So although static equilibrium theory is not a good vehicle for studying economic growth showing how scale effects operate when output varies with given technology helps us to understand the scale effects that occur when output rises as a result of economic growth even though that is typically driven by technological change **Experimental Methods** Daniel Friedman, Shyam Sunder, 1994-01-28 Experimental economics is a rapidly growing field of inquiry and there currently exist several textbooks and surveys describing the results of laboratory experiments in economics This primer however is the first hands on guide to the physical aspects of actually conducting experiments in economics It tells researchers teachers and students in economics how to deal with human subjects how to design meaningful laboratory environments how to design experiments how to conduct experiments and how to analyse and report the data It also deals with methodological issues It can be used to structure an undergraduate or graduate course in experimental economics Managing the Commons, Second Edition John A. Baden, Douglas S. Noonan, 1998-04-22 Garrett Hardin s seminal essay The Tragedy of the Commons appeared in 1968 and has been at the center of the debate on commonly owned ground or resources such as Western public grazing or the oceans This is the second edition of a book exploring the issues raised in Hardin s essay As scarce resources are increasingly strained It is ever more crucial to identify those resources which are held in common and are therefore prone to tragic waste and abuses The essay in this volume focus on alternate institutional approaches to managing these resources to prevent such tragedy *On the Metabolism of Ergothioneine* /by Olive Dorcas Hoffman Olive Dorcas Hoffman, 1937
