1992 brought Touring estate models 4 wheel drive variants and advanced new 4 valve engines Between 1992 and 1996 the third phase brought annual updates including VANOS variable valve timing and new V8 engines for the top of the range models In the BMW tradition these cars combined strong performance with excellent handling and these qualities were exploited to the hilt by the M5 variants produced by the legendary M Division Aftermarket tuning specialists made their own contributions too adding to the aura of glamour around the E34 range There were lesser known elements of the story too when BMW used the E34 range for some fascinating experiments with hybrid power systems a convertible and a dual fuel system
