The scaling factor is activated with the **scale** key. The scaling factor is deactivated with the **0**, **1**, and **2** keys. If the **scale** key is pressed again, the corresponding value for the scaling factor is chosen and can be altered with the **0**, **1**, and **2** keys. If the scaling with the unit is not continued within ten minutes, the device automatically returns to the measuring mode without accepting the new value.

To improve programming speed quickly, you can switch back to the measuring mode (primary mode) from any state in the menu by pressing the **0** key, provided for the seconds.

If the software lock has been activated, the values can be shown, but no changes made, i.e. when **Lock On** or **action (LOCK)** appears in the display when an attempt is made to change values.
