Beyond Capital Computing Routledge Sociology:

Beyond Capital David Hakken, Maurizio Teli, Barbara Andrews, 2015-10-23 The financial social cataclysm beginning in 2007 ended notions of a great moderation and the view that capitalism had overcome its systemic tendencies to crisis The subsequent failure of contemporary social formations to address the causes of the crisis gives renewed impetus to better analysis in aid of the search for a better future This book contributes to this search by reviving a broad discussion of what we humans might want a post capitalist future to be like It argues for a comparative anthropological critique of capital notions of value thereby initiating the search for a new set of values as well as identifying a number of selected computing practices that might evoke new values It articulates a suggestive set of institutions that could support these new values and formulates a group of measurement practices usable for evaluating the proposed institutions The book is grounded in contemporary social science political theory and critical theory It aims to leverage the possibility of alternative futures implied by some computing practices while avoiding hype and technological determinism and uses these computing practices to explicate one possible way to think about the future

The Reflexive Initiative Stanley Raffel, Barry Sandywell, 2016-03-31 The Reflexive Initiative is an authoritative intervention in the practice and tradition of reflexive social theory It demonstrates the importance of the reflexive imperative not only in the investigation of everyday life but across a wide range of human sciences and philosophical perspectives Forty years after the publication of *On the Beginning of Social Inquiry* the chapters in this collection range from re appraisals of earlier essays on topics such as reunions rethinking art and expats to contributions emphasising the opening of radical dialogues with other reflexive traditions and perspectives These include psychoanalysis Lacan Hegel Rene Girard Daseinanalysis dialectical method critical feminism and the dialogical tradition In this dialogical spirit the book contributes to the continuing project of analytic theorizing associated with the work of Alan Blum and Peter McHugh and the recent turn to more existential topics and politically engaged forms of reflexive research It will be of particular use to students working in interpretive traditions of sociology Critical theory Postmodern thought and debates associated with reflexivity and dialectics in other disciplines and research programmes

Participatory Design Theory Oswald Devisch, Liesbeth Huybrechts, Roel De Ridder, 2018-10-03 In recent years many countries all over Europe have witnessed a demand for a more direct form of democracy ranging from improved clarity of information to being directly involved in decision making procedures Increasingly governments are putting citizen participation at the centre of their policy objectives striving for more transparency to engage and empower local individuals and communities to collaborate on public projects and to encourage self organization This book explores the role of participatory design in keeping these participatory processes public It addresses four specific lines of enquiry how can the use and or development of technologies and social media help to diversify to coproduce to interrupt and to document democratic design experiments Aimed at researchers and academics in the fields of urban planning and participatory design this book includes contributions from a

range of experts across Europe including the UK Belgium the Netherlands Italy Denmark Austria Spain France Romania Hungary and Finland **Challenging Identities** Peter Madsen, 2016-08-12 Identity is a keyword in a number of academic fields as well as in public debate and in politics During the last decades references to identity have proliferated yet there is no simple definition available that corresponds to the use of the notion in all contexts The significance of the notion depends on the conceptual or ideological constellation in which it takes part This volume on one hand demonstrates the role of notions of identity in a variety of European contexts and on the other hand highlights how there may be reasons to challenge the use of the term and corresponding social cultural and political practices Notions of national identity and national politics are challenged by European integration as well as by the increasing demographic heterogeneity due to migration and migrants experience conflicts of identification stemming from clashes between cultural heritage and the cultures of the new habitat European horizons frames of mind historical memories and expectations at the level of groups or communities at the national level and at the general European level are at odds Analyzing a series of issues in European countries from Turkey to Spain and from Scandinavia to the Balkans the contributions demonstrate uses and abuses of the notion of identity *The Handbook of Science and Technology Studies, fourth edition* Ulrike Felt, Rayvon Fouche, Clark A. Miller, Laurel Smith-Doerr, 2016-12-23 The fourth edition of an authoritative overview with all new chapters that capture the state of the art in a rapidly growing field Science and Technology Studies STS is a flourishing interdisciplinary field that examines the transformative power of science and technology to arrange and rearrange contemporary societies The Handbook of Science and Technology Studies provides a comprehensive and authoritative overview of the field reviewing current research and major theoretical and methodological approaches in a way that is accessible to both new and established scholars from a range of disciplines This new edition sponsored by the Society for Social Studies of Science is the fourth in a series of volumes that have defined the field of STS It features 36 chapters each written for the fourth edition that capture the state of the art in a rich and rapidly growing field One especially notable development is the increasing integration of feminist gender and postcolonial studies into the body of STS knowledge The book covers methods and participatory practices in STS research mechanisms by which knowledge people and societies are coproduced the design construction and use of material devices and infrastructures the organization and governance of science and STS and societal challenges including aging agriculture security disasters environmental justice and climate change **Thanatourism and Cinematic Representations of Risk** Rodanthi Tzanelli, 2016-04-14 In today's world the need to eliminate natural and human made disasters has been at the forefront of national and international socio political agendas The management of risks such as terrorism labour strikes protests and environmental degradation has become pivotal for countries that depend on their economy's tourist sector Indeed there is fear that the end of tourism might be nigh due to inadequate institutional foresight Yet in designing relevant policies to tackle this arts such as that of filmmaking have yet to receive due consideration

This book adopts an unorthodox approach to debates about the end of tourism Through twenty first century cinematic narratives of symbolically interconnected risks it considers how art envisages the future of humanity s well being These risks include migration as an infectious disease alien incursions as racialized labour mobilities cyborg rebellion as the fear of post colonial otherness and zombie anthropophagy as the replacement of rooted identities by nomadic lifestyles Such filmic scenarios articulate the futuristic survival of community as the triumph of the technological human over otherness and provide a means to debate societal risks that weave identity politics into unequal mobilities This book will appeal to researchers and students interested in mobilities theory tourism and travel theory film studies and aesthetics globalisation studies race labour and migration

Mobile Computing: Concepts, Methodologies, Tools, and Applications Taniar, David, 2008-11-30 This multiple volume publication advances the emergent field of mobile computing offering research on approaches observations and models pertaining to mobile devices and wireless communications from over 400 leading researchers Provided by publisher

Cool Nations Katja Valaskivi, 2016-04-14 Nation branding is the most recent feature of imagined nation making in the history of nations Facing global competition national decision makers aim to distinguish their countries from others by means of branding Quite a few nations have considered the term cool suitable for describing some essence of their country s brand Cool Nations Media and the Social Imaginary of the Branded Country traces the mediated ways in which the transnational idea of cool has circulated from popular culture fashion and marketing into describing nations The book explores the commodification of the nation the shift to a promotional political culture and the role of media in contributing to the circulation of the idea of the Cool Nation The social imaginary of nation branding takes its theory and practices from marketing unlike earlier imaginations based on ideas of democracy or citizenship Cool Nations argues that cool is one of the vehicles through which the commodification of nations takes place

Sharing Lives Marc Szydlik, 2016-02-22 Sharing Lives explores the most important human relationships which last for the longest period of our lives those between adult children and their parents Offering a new reference point for studies on the sociology of family the book focuses on the reasons and results of lifelong intergenerational solidarity by looking at individuals families and societies This monograph combines theoretical reasoning with empirical research based on the Survey of Health Ageing and Retirement in Europe SHARE The book focuses on the following areas Adult family generations from young adulthood to the end of life and beyond Contact conflict coresidence money time inheritance Consequences of lifelong solidarity Family generations and the relationship of family and the welfare state Connections between family cohesion and social inequality Sharing Lives offers reliable findings on the basis of state of the art methods and the best available data and presents these findings in an accessible manner This book will appeal to researchers policymakers and graduate students in the areas of sociology political science psychology and economics The Open Access version of this book available at <http://www.taylorfrancis.com/books/e/9781315647319> has been made available under a Creative Commons Attribution Non Commercial

No Derivatives 4 0 license Origins of Inequality in Human Societies Bernd Baldus, 2016-07-28 Since the beginning of social life human societies have faced the problem how to distribute the results of collaborative activities among the participants The solutions they found ranged from egalitarian to unequal but caused more dissension and conflict than just about any other social structure in human history Social inequality also dominated the agenda of the new field of sociology in the 19th century The theories developed during that time still inform academic and public debates and inequality continues to be the subject of much current controversy Origins of Inequality begins with a critical assessment of classical explanations of inequality in the social sciences and the political and economic environment in which they arose The book then offers a new theory of the evolution of distributive structures in human societies It examines the interaction of chance intent and unforeseen consequences in the emergence of social inequality traces its irregular historical path in different societies and analyses processes of social control which consolidated inequality even when it was costly or harmful for most participants Because the evolution of distributive structures is an open process the book also explores issues of distributive justice and options for greater equality in modern societies Along with its focus on social inequality the book covers topics in cultural evolution social and economic history and social theory This book will appeal to scholars and advanced students of sociology economics and anthropology in particular sociological theory and social inequality
