built upon a single distinctive human capacity. It may be that our highly evolved mental power to envision and think about the future is at the core of our greatest accomplishments and most unique human attributes. In *The Evolution of Future Consciousness*, psychologist and futurist Tom Lombardo examines the human ability to be conscious of the future to create ideas, images, goals, and plans about the future to think about these mental creations and use them in directing one's actions and one's life. In the opening chapter, he looks at the psychology of future consciousness and its values and benefits as well as ways to enhance this human ability. Subsequent chapters describe the emergence of future consciousness in pre-historic times and how it was critical in the development of love and bonding, the family, tools, and human aggression and hunting. The central importance of the future and time in early myths, religions, and classical philosophy and the rise of modern futurist thinking covering the Renaissance, the Scientific Revolution, the Western Enlightenment, and the Romantic counter-reaction. The book concludes with Darwin and how the theory of evolution revolutionized humanity's conception of both the past and the future. In its companion volume *Contemporary Futurist Thought*, Tom Lombardo completes his survey of the historical development of future consciousness, discussing significant ideas and approaches to the future in the last century, including science fiction, future studies, and an extensive array of recent theories and paradigms of the future. **The Ethical Society**

William T. Carruthers, 2021-08-19. How is it that we know we are headed for destruction as a species and yet are unable to effect the necessary changes needed for survival? We know from history that our current thinking and values will not lead to a peaceful, sustainable future. It is more crucial now than ever that we learn to break the cycle so that we can create a global community that balances diversity and individuality with integration and harmony. The answer lies in how we think. We are trapped in social systems based on power structures designed to keep us divided in antagonistic and non-viable behaviors. We have divorced how we understand the world through science with how we find meaning in our lives through religion, alienating us from the world and each other. To overcome these challenges, we need to focus our thinking on the global community by giving priority to universal ethical values. With ethical priority, we can shift power interests from a tribal to a human perspective and reconnect understanding with meaning. We can reduce alienation and improve harmony around the world. In *The Ethical Society*, William Carruthers provides the roadmap for us to finally achieve that peaceful, sustainable world.

Jim Dator: A Noticer in Time, Jim Dator, 2019-08-19. This book features a selection of the published writings and public presentations of Jim Dator. Most of the chapters are directly concerned with futures studies and ideas about the future. The topic covers many disciplines and subjects. It is also concerned with many different parts of the world, even Mars. In addition, a few of the earlier papers contained here are about more conventional topics in politics and religion. The collection spans a more than 50-year period of thought, reflection, and instruction. In particular, the papers examine six main topics. These include meditations on the very nature of future studies, visions of preferred futures, ideas about alternative futures, and details on future theories and methods. Coverage also considers such specific topics as AI and robots, the

environment food culture energy families future generations and more Overall these papers help readers gain insight into what it takes to weave together alternative images of the future in useful ways They also reveal cross disciplinary patterns in key fields of human endeavor that will help readers better understand trends and emerging issues *Psychic Children* Peggy Day,Susan Gale,2004-11 The late twentieth and early twenty first centuries have heralded the birth of many special children who exhibit unique sensitivities and abilities This book shows how these children can be recognized and nurtured as the special people they truly are *Global Heating and the Australian Far Right* Imogen Richards,Gearóid Brinn,Callum Jones,2023-12-01 Global Heating and the Australian Far Right examines the environmental politics of far right actors and movements in Australia exploring their broader political context and responses to climate change The book traces the development of far right pseudo environmentalism and territorial politics from colonial genocide and Australian nationalism to extreme right political violence Through a critical analysis of news and social media it reveals how denialist and resignatory attitudes towards climate change operate alongside extreme right accelerationism in a wider Australian political context characterised by reactionary fossil fuel politics and neoliberal New Right climate change agendas The authors scrutinise the manipulation of environmental politics by contemporary Australian far and extreme right actors in cross national online media They also assess the political ideological context of the contemporary far right addressing intergovernmental approaches to security threats connected to the far right and climate change and the emergence of radical environmentalist traditions in New Catastrophism literature The conclusion synthesises key insights analysing the mainstreaming of ethnonationalist and authoritarian responses to global heating and potential future trajectories of far right movements exploiting the climate crisis It also emphasises the necessity for radical political alternatives to counter the far right s exploitation of climate change This book will be of interest to researchers of climate change the far right neoliberal capitalism extremism and Australian politics **Wild Earth, Wild Soul (2nd Edition)** Sky Otter,2025-04-29 Imagine a nature based culture so alive and so connected spreading like wildfire This book is the match *Wild Earth, Wild Soul* Bill Pfeiffer,2013-06-28 Humankind has the capacity and know how to create Earth honoring cultures in a new way for new times Through tapping into ancestral memories taking what s best from the human potential movement and collaborating with present day indigenous peoples we can find our way home Practicing the key ingredients of a lasting culture is an ecstatic way to live This book shows you how
