reverse the above four characteristics of the cancer in order to heal it. None of these are addressed by conventional cancer treatment. Bill's mission to help cancer patients heal started with his experience with his former wife Marjorie. Her ovarian cancer was treated with conventional cancer treatment from 1990 to 1994 when she died. Bill is convinced that the treatment killed her. He wants to help as many people as possible avoid her fate. Dr. Garcia's mission is to help cancer patients heal themselves starting in a controlled clinical environment and continuing at home. He has been doing this successfully for 15 years.

Cancer Strategy: Worldwide Solutions to a Worldwide Problem Patrick Bishop, 2025-04-10

Cancer Strategy Critical Thinking by Patrick Bishop is a comprehensive empowering guide to navigating the complex world of cancer care, blending scientific insight with holistic and integrative approaches. Spanning over 400 pages, the book targets patients, caregivers, and practitioners, offering a roadmap to understand cancer biology, evaluate treatment options, and adopt preventive strategies for improved outcomes. Bishop, a serial entrepreneur and cancer researcher driven by personal losses—his grandfather, father, and brother all succumbed to cancer—infuses the text with 19 years of research and a heartfelt call for thoughtful decision making. The book opens with a prologue on the biology of belief, where Bishop explores how faith and positive thinking influence health, rooted in his Christian convictions. This sets the tone for a mind-body-spirit approach, suggesting that mental and spiritual resilience can complement physical healing. The introduction frames cancer as both a medical and personal journey, advocating for a balanced strategy that integrates conventional treatments like chemotherapy and surgery with non-toxic alternatives such as acupuncture, Gerson Therapy, and detoxification. Key sections delve into cancer's biological underpinnings, explaining the immune system's role in fighting malignant cells, the multistage process of carcinogenesis (initiation, promotion, progression), and the significance of early detection through screenings like mammograms and colonoscopies. Bishop highlights preventive lifestyle factors: diet (e.g., ketogenic, plant-based), exercise, sleep, and stress reduction, while introducing the unique oral-systemic connection linking dental health issues like root canals to cancer risk via chronic inflammation. A central feature is an extensive treatment catalog detailing over 50 therapies with their toxicity levels (low, moderate, high) and FDA approval status as of December 2024. Conventional options (e.g., radiation, immunotherapy) sit alongside integrative methods (e.g., hyperbaric oxygen, Ayurveda), each evaluated for benefits and limitations to aid informed choices. Bishop emphasizes personalized medicine, spotlighting genetic testing and targeted therapies to tailor care to individual needs. The book also tackles practical and ethical challenges: building a multidisciplinary care team (oncologists, naturopaths, caregivers), addressing financial toxicity, the hidden cost burden of treatment, and navigating survivorship, palliative, and end-of-life care. A critique of the pharmaceutical-driven healthcare system argues for a shift from profit-focused drug dependency to prevention-focused wellness. Looking forward, Bishop explores emerging technologies like liquid biopsies, AI diagnostics, and gene editing, blending them with holistic practices to envision a future of patient-centered cancer care. Ultimately, **Cancer Strategy Critical Thinking** empowers readers with knowledge, hope, and resilience, urging a proactive
