Adhami,III Peter M. Meenen,Peter Meenen,Denis Hite,2007 In many cases the beginning engineering student is thrown into upper level engineering courses without an adequate introduction to the basic material This at best causes undue stress on the student as they feel unprepared when faced with unfamiliar material and at worst results in students dropping out of the program or changing majors when they discover that their chosen field of engineering is not what they thought it was The purpose of this text is to introduce the student to a general cross section of the field of electrical and computer engineering The text is aimed at incoming freshmen and as such assumes that the reader has a limited to nonexistent background in electrical engineering and knowledge of no more than pre calculus in the field of mathematics By exposing students to these fields at an introductory level early in their studies they will have both a better idea of what to expect in later classes and a good foundation of knowledge upon which to build **Basics of Electrical Engineering** Sanjeev Sharma,2007
