Beyond Blood Identities Jason D. Hill, 2009-11-05 *Beyond Blood Identities* uncovers the social psychology of those who hold strong blood identities In this highly original work Jason D Hill argues that strong racial ethnic and national identities which he refers to as tribal identities function according to a separatist logic that does irreparable damage to our moral lives Drawing on scholarship in philosophy sociology and cultural anthropology Hill contends that strong tribalism is a form of pathology *Beyond Blood Identities* shows how a particular understanding of culture could lead to a new theoretical approach to enriched human living Hill develops a new version of cosmopolitanism that he calls post human cosmopolitanism to solve a number of challenges in contemporary society From the problem of defining culture the failure of multiculturalism the question of who owns native culture the identification of Jews as post human people and the problem of their status as chosen people in a modern world the author applies a cosmopolitan analysis to some of the major problems in our global and interdependent world He posits a world in which community has been dispensed with and replaced by its successor term sociality the broad unmarked space in which creative social intercourse takes place Hill applies a new cosmopolitanism to ideate a new post humanity for the twenty first century

The Ethics and Mores of Race Naomi Zack, 2015-04-02 Preeminent philosopher Naomi Zack brings us an indispensable work in the ethics of race through an inquiry into the history of moral philosophy Beginning with Plato and a philosophical tradition that has largely ignored race *The Ethics and Mores of Race* Equality after the History of Philosophy enters into a web of ideas ethics and morals that untangle our evolving ideas of racial equality straight into the twenty first century The dichotomy between ethics and mores has long aided the separation of what is right with ideas of equality Zack tackles the co existence of slavery with the classic moral systems and continues to show how our society has evolved and our mores with it

An ethics of race may not exist yet but this book gives us twelve discerning requirements to establish it In the preface to the paperback edition Zack addresses the criticisms raised in response to this book and concludes that a focus on rights and justice rather than privilege is the only fruitful pathway towards a functioning ethics of race

Rewriting American Identity in the Fiction and Memoirs of Isabel Allende B. Craig, 2013-08-20 Moving away from territorially bound narratives toward a more kinetic conceptualization of identity this book represents the first analysis of the politics of American identity within the fiction and memoirs of Isabel Allende Craig offers a radical transformation of societal frameworks through revised notions of place temporality and space

Emerging Englishes Alex Baratta, Rui He, Paul Vincent Smith, 2024-11-22 This book encourages further conversation on the expanding circle in World Englishes offering a detailed look at China English through the academic writing of Chinese students at a British university The volume seeks to blur the simplistic binary of Chinglish a broad term often understood to encompass grammatical or lexical errors or seemingly unnatural expressions and China English which the authors articulate here as its own variety as evidenced in language use marked by predictability The research framework begins with analysing student essays in one programme at the University of Manchester predominantly made up of Chinese students In highlighting recurring features and supported by online surveys of the students the authors demonstrate how China English displays the systematicity in grammar and lexis observed in varieties of English In focusing on academic writing a genre which bears prominence in assessment the book raises key questions about implications for teaching what is considered appropriate language and whether rather than seeking to replace Standard English the notion of what is standard might be broadened to encompass other varieties The book further promotes implications beyond pedagogies to include learning more broadly marking curriculum policy training and identity negotiation This book will be of interest to students and scholars in language and education World Englishes sociolinguistics and applied linguistics

The Teacher and the World David Hansen, 2017-07-20 Winner of the 2013 American Educational Studies Association's 2013 Critics Choice Award Teachers the world over are seeking creative ways to respond to the problems and possibilities generated by globalization Many of them work with children and youth from increasingly varied backgrounds with diverse needs and capabilities Others work with homogeneous populations and yet are aware that their students will encounter many cultural changes in their lifetimes All struggle with the contemporary conditions of teaching endless top down measures to manipulate what they do rapid economic turns and inequality in supportive resources that affect their lives and those of their students a torrent of media stimuli that distract educational focus and growth as well as shifts in population In *The Teacher and the World* David T Hansen provides teachers with a way to reconstruct their philosophies of education in light of these conditions He describes an orientation toward education that can help them to address both the challenges and opportunities thrown their way by a globalized world Hansen builds his approach around cosmopolitanism an ancient idea with an ever present and ever beautiful meaning for educators The idea pivots around

educating for what the author calls reflective openness to new people and new ideas and reflective loyalty toward local values interests and commitments The book shows how this orientation applies to teachers at all levels of the system from primary through university Hansen deploys many examples to illustrate how its core value a balance of reflective openness to the new and reflective loyalty to the known can be cultivated while teaching different subjects in different kinds of settings The author draws widely on the work of educators scholars in the humanities and social sciences novelists artists travellers and others from both the present and past as well as from around the world These diverse figures illuminate the promise in a cosmopolitan outlook on education in our time In this pioneering book Hansen has provided teachers heads of school teacher educators researchers and policy makers a generative way to respond creatively to the pressure and the promise of a globalizing world

Retrieving Liberalism from Rationalist Constructivism, Volume I Walter B. Weimer, 2022-05-07 This first volume History and its Betrayal traces the development of major themes of liberalism from the increase in human population beyond the limits of the face to face society of tribalism and small groups up until the present day It shows that the principles underlying liberalism are the evolutionary development of social organizations that have resulted from the complexity of human action rather than any conscious design or purpose This book draws out the differences between the classical liberalism dependent upon spontaneous and tacit ordering as a result of evolution and the explicit or conscious or directed version of progressivism It shows that the most important recent developments in the philosophy of rationality and the methodology of scientific research as well as in evolutionary epistemology and the philosophy of biology actually stem from the theories of complex social organization of the moralists such as Hume Ferguson and Smith The book shows clearly that classical liberalism was never refuted indeed no attempt to do so has been offered it has simply been ignored in favour of programs which sound beneficial and soothing but which cannot be instituted without returning to tribalism

The Oxford Handbook of Philosophy and Race Naomi Zack, 2017 The Oxford Handbook of Philosophy and Race provides up to date explanation and analyses by leading scholars in African American philosophy and philosophy of race Fifty one original essays cover major topics from intellectual history to contemporary social controversies in this emerging philosophical subfield that supports demographic inclusion and emphasizes cultural relevance

What Do White Americans Owe Black People? Jason D. Hill, 2021-10-12 In this provocative and highly original work philosophy professor Jason D Hill explores multiple dimensions of race in America today but most importantly a black white divide which has grown exponentially over the past decade Central to his thesis Hill calls on black American leaders and their white liberal sponsors to escape from the cycle of blame and finger pointing which seeks to identify black failures with white hatred and indifference This overblown narrative is promulgated by a phalanx of black nihilists who advocate the destruction of America and her institutions in the name of ending whiteness Much of the black intelligentsia consists of these false prophets and it is their poisonous ideology which is taught uncontradicted to students of all races It is they who are responsible for the cultural depression blacks are

suffering in today's society. Ultimately the answer to what do White Americans owe is not about the morality or practicality of reparations, affirmative action, or other redistributionist schemes. Hill rejects the collectivist premise behind the argument, instead couching notions of culpability, justice, and fairness as responsibilities of individuals, not arbitrary racial or ethnic groupings.

Adult Faith Diarmuid O'Murchu, 2010. This relatively new culture of the adult faith seeker originated in the closing decades of the twentieth century as developmental psychology highlighted the changing nature of growth and maturity at different life stages. Accompanied by the information explosion, adult people particularly began to ask questions for which they sought adult answers. The co-dependency of earlier times, expecting adults to simply accept what religious authorities taught, is alien to adult religious maturity. Adult faith has arrived at a new threshold requiring novel approaches and strategies in the religious development of adult people. Diarmuid O'Murchu charts this evolutionary development, highlighting dimensions of conventional religion which no longer inspire or offer hope along with those that nurture and mature, and sheds new light on the spiritual horizons which contemporary adults seek to embrace. The result is a path-breaking book that empowers adult faith seekers to confidently grow in wisdom and in grace, and that enables the church to use its resources to strengthen the faith of its people at a time of great change in how people think about religion.
