Beyond Technology's Promise Joseph B. Giacquinta, Jo Anne Bauer, Jane E. Levin, 1993 This book first published in 1994 examines how children use home computers and proposes steps to facilitate a better educational use of available technology

Sustainability Beyond Technology Pasi Heikkurinen, Toni Ruuska, 2021-03-29 Current debates on sustainability are largely building on a problematic assumption that increasing technology use and advancement are a desired phenomenon creating positive change in human organizations This kind of techno optimism prevails particularly in the discourses of ecological modernization and green growth as well as in the attempts to design sustainable modes of production and consumption within growth driven capitalism This transdisciplinary book investigates the philosophical underpinnings of technology presents a culturally sensitive critique to technology and outlines feasible alternatives for sustainability beyond technology It draws on a variety of scholarly disciplines including the humanities philosophy and environmental history social sciences ecological economics political economy and ecology and natural sciences geology and thermodynamics to contribute to sustainability theory and policy By examining the conflicts and contradictions between technology and sustainability in human organization the book develops a novel way to conceptualize confront and change technology in modern society

Beyond Tech Fixes Christo El Morr, Yahya El-Lahib, Rachel da Silveria Gorma, 2025-09-30 This book offers a bold and critical examination of the intersections between artificial intelligence AI and disability justice Rather than framing AI as a neutral or purely beneficial tool the book interrogates how AI systems reproduce ableism deepen systemic exclusions and perpetuate colonial neoliberal and corporate power structures It challenges the prevailing reliance on tech fixes improving datasets or tweaking algorithms and instead insists on addressing the deeper social political and ethical dimensions of AI development and deployment Through a disability justice lens it highlights the complex realities faced by disabled communities and emphasizes the need for approaches that dismantle ableism rather than superficially enhance accessibility Covering topics such as algorithmic bias data colonialism technoableism and the militarization of AI this book foregrounds critical frameworks including design justice data sovereignty and participatory governance It draws on diverse scholarly perspectives and activist insights to propose actionable pathways toward more accountable equitable and inclusive AI futures By centering disabled people's experiences and knowledge the book offers not only critique but also visionary strategies for transforming AI systems to serve justice rather than entrench oppression

Beyond Technology David Buckingham, 2013-04-17 Beyond Technology offers a challenging new analysis of learning young people and digital media Disputing both utopian fantasies about the transformation of education and exaggerated fears about the corruption of childhood innocence it offers a level headed analysis of the impact of these new media on learning drawing on a wide range of critical research Buckingham argues that there is now a growing divide between the media rich world of children's lives outside school and their experiences of technology in the classroom Bridging this divide he suggests will require more than

superficial attempts to import technology into schools or to combine education with digital entertainment While debunking such fantasies of technological change Buckingham also provides a constructive alternative arguing that young people need to be equipped with a new form of digital literacy that is both critical and creative Beyond Technology will be essential reading for all students of the media or education as well as for teachers and other education professionals
