Seeking Justice for the Holocaust Graham B. Cox, 2019-09-12 The Nuremberg War Crimes Trial has become a symbol of justice the pivotal moment when the civilized world stood up for Europe's Jews and ultimately for human rights Yet the world represented at the time by the Allied powers almost did not stand up despite the magnitude of the horrors perpetrated by the Nazis Seeking justice for the Holocaust had not been an automatic or an obvious mission for the Allies to pursue In this book Graham Cox recounts the remarkable negotiations and calculations that brought the United States and its allies to this point At the center of this story is the collaboration between Franklin D Roosevelt and Herbert C

Pell Roosevelt's appointee as U.S. representative to the United Nations War Crimes Commission in creating an international legal protocol to prosecute Nazi officials for war crimes and genocide Pell emerges here as an unheralded force in pursuing justice and in framing human rights as an international concern The book also enlarges our perspective on Roosevelt's policies regarding European Jews by revealing the depth of his commitment to postwar justice in the face of staunch opposition even from some within his administration What made the international effort especially contentious was a debate over its focus how to punish for aggressive warfare and crimes against humanity Cox exposes the internal contradictions and contortions behind the U.S. position and the maneuverings of numerous officials negotiating the legal parameters of the trials Most telling perhaps were the efforts of Robert H. Jackson the chief U.S. prosecutor at Nuremberg to circumscribe the scope of new international law for fear of setting precedents that might boomerang on the United States because of its own racial segregation practices With its broad new examination of the background and context of the Nuremberg trials and its expanded view of the roles played by Roosevelt and his unlikely deputy Pell *Seeking Justice for the Holocaust* offers a deeper and more nuanced understanding of how the Allies came to hold Nazis accountable for their crimes against humanity

Howard Aiken I. Bernard Cohen, 2000 *Biography of Howard Aiken* a major figure of the early digital era by a major historian of science who was also a colleague of Aiken's at Harvard Howard Hathaway Aiken 1900-1973 was a major figure of the early digital era He is best known for his first machine the IBM Automatic Sequence Controlled Calculator or Harvard Mark I conceived in 1937 and put into operation in 1944 But he also made significant contributions to the development of applications for the new machines and to the creation of a university curriculum for computer science This biography of Aiken by a major historian of science who was also a colleague of Aiken's at Harvard offers a clear and often

entertaining introduction to Aiken and his times Aiken's Mark I was the most intensely used of the early large scale general purpose automatic digital computers and it had a significant impact on the machines that followed Aiken also proselytized for the computer among scientists scholars and businesspeople and explored novel applications in data processing automatic billing and production control But his most lasting contribution may have been the students who received degrees under him and then took prominent positions in academia and industry I Bernard Cohen argues convincingly for Aiken's significance as a shaper of the computer world in which we now live
