Building Intelligent Information Systems Software Introducing The Unit Modeler Development Technology:

Building Intelligent Information Systems Software Thomas D. Feigenbaum, 2015-12-07 Building Intelligent Information Systems Software shows scientists and engineers how to build applications that model complex information data and knowledge without the need for coding Traditional software development takes time and leads to inflexible complicated applications that almost but don't exactly meet the intended needs Requirements can change sometimes mid development and adapting existing systems can be difficult Individual solutions can be incompatible leading to information silos and inefficiency throughout an organization This book offers a solution the Information Unit Model an innovative architecture for translating domain knowledge into applications By encapsulating the complexities of computing the Unit Model allows engineers to focus on business or experimental needs Author Tom Feigenbaum inventor of the Unit Modeler demonstrates this innovative software architecture for rapid application design and development His approach promotes repurposing pre existing tools and libraries and collaborating across the cloud to promote information sharing and efficient development practices Each concept is illustrated with examples including file management data management and 3D visualization Turn your domain knowledge into applications without heavy coding Design and develop information systems applications in a fraction of the time of traditional methods Leverage previously built components to jump start new projects Includes access to a trial version of the Information Unit Modeler tool for rapid application development

Intelligent Information Processing and Web Mining Mieczyslaw A. Klopotek, Slawomir T. Wierzchon, Krzysztof Trojanowski, 2013-06-05 This volume contains articles accepted for presentation during The Intelligent Information Processing and Web Mining Conference IIS IIPWM 03 which was held in Zakopane Poland on June 2-5 2003 This conference extends a series of 12 successful symposia on Intelligent Information Systems organized by the Institute of Computer Science of Polish Academy of Sciences devoted to

new trends in broadly understood Artificial Intelligence The idea of organizing such meetings dates back to 1992 Our main intention guided the first rather small audience workshop in the series was to resume the results gained in Polish scientific centers as well as contrast them with the research performed by Polish scientists working at the universities in Europe and USA and their foreign collaborators This idea proved to be attractive enough that we decided to continue such meetings As the years went by the workshops has transformed into regular symposia devoted to such fields like Machine Learning Knowledge Discovery Natural Language Processing Knowledge Based Systems and Reasoning and Soft Computing i e Fuzzy and Rough Sets Bayesian Networks Neural Networks and Evolutionary Algorithms At present about 50 papers prepared by researches from Poland and other countries are usually presented This year conference is an attempt to draw a much broader international audience on the one hand and to devote much more attention to the newest developments in the area of Artificial Intelligence Therefore special calls for contributions on artificial immune systems and search engines

Intelligent Information Systems Cristina Cabanillas,Francisca Pérez,2023-06-07 This book constitutes the thoroughly refereed proceedings of the CAiSE Forum 2023 which was held in Zaragoza Spain in June 2023 as part of the 35th International Conference on Advanced Information Systems Engineering CAiSE 2023 The CAiSE Forum is a place within the CAiSE conference for presenting and discussing new ideas and tools related to information systems engineering Intended to serve as an interactive platform the Forum aims at the presentation of emerging new topics and controversial positions as well as demonstration of innovative systems tools and applications This year s edition of the conference put a special emphasis on the theme of Cyber Human Systems A total of 25 papers was sent for peer review 12 of these papers were invited from CAiSE and 13 have been directly submitted to the Forum After a careful review and selection 12 of the invited and 6 of the newly submitted papers have been accepted for publication

Artificial Intelligence Applications and Innovations Vladan Devedžic,2006-04-11 Artificial Intelligence and Innovations AIAI will interest researchers IT professionals and consultants by examining technologies and applications of demonstrable value The conference focused on profitable intelligent systems and technologies AIAI focuses on real world applications therefore authors should highlight the benefits of AI technology for industry and services Novel approaches solving business and industrial problems using AI will emerge from this conference
