Under the Hood Developing a Content Strategy Glossary Bibliography and Index Managing Employee Retention Jack J. Phillips, Adele O. Connell, 2004-02-18 During the past decade employee turnover has become a very serious problem for organizations Managing retention and keeping the turnover rate below target and industry norms is one of the most challenging issues facing business All indications point toward the issue compounding in the future and even as economic times change turnover will continue to be an important issue for most job groups Yet despite these facts employee turnover continues to be the most unappreciated and undervalued issue facing business leaders There are a variety of reasons for this for example the true cost of employee turnover is often underestimated The causes of turnover are not adequately identified and solutions are often not matched with the causes so they fail Preventive measures are either not in place or do not target the issues properly and therefore have little or no effect and a method for measuring progress and identifying a monetary value ROI on retention does not exist in most organizations Managing Employee Retention is a practical guide for managers to retain their talented employees It shows how to manage and monitor turnover and how to develop the ROI of keeping your talent using innovative retention programs The book presents a logical process of managing retention from identifying turnover costs and causes designing solutions that match the causes of turnover developing tools for tracking turnover and placing alerts when action is needed and measuring the ROI of retention programs User-Centered Design Stories Carol Righi, Janice James, 2010-07-27 User Centered Design Stories is the first user centered design casebook with cases covering the key tasks and issues facing UCD practitioners today Intended for both students and practitioners this book follows the Harvard Case study method where the reader is placed in the role of the decision maker in a real life professional situation In this book the reader is asked to analyze dozens of UCD work situations and propose solutions for the problem set The problems posed in the cases cover a wide variety of key tasks and issues faced by practitioners including those related to organizational managerial topics UCD methods and processes and technical project issues The benefit of the casebook and its organization is that it offers new practitioners as well as experienced practitioners working in new settings valuable practice in decision making that cannot be obtained by simply reading a book or attending a seminar The first User Centered Design Casebook with cases covering the key tasks and issues facing UCD practitioners today Each chapter based on real world cases with complex problems giving readers as close to a real world experience as possible Offers the things you don't learn in school such as innovative and hybrid solutions that were actually used on the problems discussed Pervasive Computing Friedemann Mattern, Mahmoud Naghshineh, 2003-08-02 This volume contains the proceedings of Pervasive 2002 the first in a series of international conferences on Pervasive Computing The conference took place at ETH Zurich from August 26 to 28 2002 Its objective was to present discuss and explore the latest technical developments in the emerging field of pervasive computing as well as potential future directions Pervasive Computing is a cross disciplinary area that extends the application of computing to diverse usage models It covers a broad set of research topics such as low power integrated

technologies embedded systems mobile vices wireless and mobile networking middleware applications user interfaces security and privacy The great amount of interest we are witnessing in Per sive Computing is driven by relentless progress in basic information technologies such as microprocessors memory chips integrated sensors storage devices and wireless communication systems that continue to enable ever smaller lighter and faster systems Such systems are also becoming affordable due to their high integration and mass production paving the way for their adoption *Ethnography and the Corporate Encounter* Melissa Cefkin,2009 Businesses and other organizations are increasingly hiring anthropologists and other ethnographically oriented social scientists as employees consultants and advisors The nature of such work as described in this volume raises crucial questions about potential implications to disciplines of critical inquiry such as anthropology In addressing these issues the contributors explore how researchers encounter and engage sites of organizational practice in such roles as suppliers of consumer insight for product design or marketing or as advisors on work design or business and organizational strategies The volume contributes to the emerging canon of corporate ethnography appealing to practitioners who wish to advance their understanding of the practice of corporate ethnography and providing rich material to those interested in new applications of ethnographic work and the ongoing rethinking of the nature of ethnographic praxis

Advances in Information and Communication Kohei Arai,2021-04-12 This book aims to provide an international forum for scholarly researchers practitioners and academic communities to explore the role of information and communication technologies and its applications in technical and scholarly development The conference attracted a total of 464 submissions of which 152 submissions including 4 poster papers have been selected after a double blind review process Academic pioneering researchers scientists industrial engineers and students will find this series useful to gain insight into the current research and next generation information science and communication technologies This book discusses the aspects of communication data science ambient intelligence networking computing security and Internet of things from classical to intelligent scope The authors hope that readers find the volume interesting and valuable it gathers chapters addressing state of the art intelligent methods and techniques for solving real world problems along with a vision of the future research
