Hatzopoulos, Despina J. Hatzopoulos, 2024-10-01 This book is addressed to students and professionals and it is aimed to cover as much as possible the broader region of topographic mapping as it has evolved into a modern field called geospatial information science and technology More

emphasis is placed on using scientific methods and tools materialized in algorithms and software to produce practical results. For this reason, beyond the written material, there are also many educational and professional software programs written by the first author to help comprehend the individual methodologies developed. The Target of this book is to provide the people who work in fields of applications of topographic mapping, environment, geology, geography, cartography, engineering, geotechnical, agriculture, forestry, geointelligence, etc., a source of knowledge for the broader region so that to help them in facing relevant problems as well as in preparing contracts and specifications for such type of work assigned to professionals and evaluating such contracting results. It also aims to be a reference for theory and practice for professionals in Topographic Mapping. This book applies a didactics method where, with a relatively small effort, someone can digest a large volume of simple or complicated knowledge material at a desirable scientific depth within a relatively short time interval. The objective that educated people must be smarter than the machine and not treat the machine as a black box being button pushers has been achieved through the first author's experience in the USA and Greece with relative success by adopting this didactics technique. There are 14 chapters including Reference systems and Projections, Topographic instruments and Geometry of coordinates, Conventional construction of a topographic map, Design and reproduction of a thematic map, Digital Topographic mapping, GIS, Digital Terrain Models, DTM, DEM, GPS, GNSS methods of Photogrammetry, Remote Sensing, new technologies, LIDAR, IFSAR, Augmented reality, Mapping with UAS, UAV, Drones, the method of Least Squares adjustment, and Description of educational software accompanying the text.

What is e-book? Nicolae Sfetcu, 2014-05-10. The e-book guide for publishers: how to publish EPUB format, ebook readers and suppliers. An electronic book, also e-book, ebook, electronic book, digital book, is a book-length publication in digital form consisting of text, images, or both, and produced on, published through, and readable on computers or other electronic devices. An e-book can be purchased, borrowed, downloaded, and used immediately, whereas when one buys or borrows a book, one must go to a bookshop, a home library, or public library during limited hours or wait for a delivery. Electronic publishing or ePublishing includes the digital publication of e-books and electronic articles and the development of digital libraries and catalogues. EPUB, short for electronic publication, alternatively capitalized as ePub, ePUB, EPub, or epub, with EPUB preferred by the vendor, is a free and open e-book standard by the International Digital Publishing Forum (IDPF). Self-publishing is the publication of any book or other media by the author of the work without the involvement of an established third-party publisher. One of the greatest benefits brought about by ebooks software is the ability for anyone to create professional ebooks without having to fork out thousands of dollars to design and publish a book. People can easily become authors overnight and earn income from selling online ebooks.
