The International Workshop on Web Engineering was dedicated to the discussion of the principal issues that emerge in the design and implementation of large scale complex Web based systems Scalability issues pose a number of challenging problems to solve for both applications and the underlying web network infrastructure On one hand web services and internet applications must take into account network performance and transport protocol design to achieve acceptable performance and robustness On the other hand emerging network and Web technologies are determined by the requirements of these applications Fifteen papers were presented that illustrated the current state of the art in this area In addition to the authors of these papers the Workshop on Web Engineering was attended by about thirty participants who contributed to the workshop by stimulating fruitful discussions at the end of each presentation Thus this workshop provided an excellent opportunity for researchers from both industry and academia to gather exchange ideas and discuss recent results in the development of Web based systems and emerging Internet applications
