

Specific gravity and API density

- API gravity is very important in industry, because its value is used to classify oils as light, medium, heavy and extra heavy. The API values for each weight of oil are as follows:
- light _____ API > 31.1
- Medium _____ API between 22.3 and 31.1
- Heavy _____ API < 22.3
- Extra heavy _____ API < 10.0
- The price of a crude oil is usually based on its API gravity, with high gravity oils have much higher prices.
