As an example, after completing this learning system, learners will not only understand concepts like flow rate versus cylinder speed and pressure versus cylinder force, but also be able to operate, install, design, and troubleshoot basic hydraulic circuits for various applications.

The 96-HYD1 includes gauges, manifolds, cylinders, valves (relief/sequence, pressure reducing, check, directional control), flow meter, and hydraulic motor, as well as a 500 psi hydraulic power unit, manifold set with shutoff valve, and an Amatrol workbench. These components are all industrial quality not only to ensure durability, but also to help learners become better prepared for what they will encounter on the job. All Amatrol products are made from top-notch materials and carefully crafted (hand-welded and painted) to create tough, attractive, well designed learning systems that will facilitate learning for years.
