

The background of the entire image is a repeating pattern of grey cow silhouettes. Overlaid on this pattern are numerous red circles of varying sizes, which are more densely clustered in the upper-left quadrant and more sparsely distributed towards the right and bottom. A dark grey rectangular box with a thin red border is positioned in the lower-middle section of the image, containing the title and authors' names.

Itineraries of Expertise Andra B. Chastain, Timothy W. Lorek, 2020-03-10 Itineraries of Expertise contends that experts and expertise played fundamental roles in the Latin American Cold War While traditional Cold War histories of the region have examined diplomatic intelligence and military operations and more recent studies have probed the cultural dimensions of the conflict the experts who constitute the focus of this volume escaped these categories Although they often portrayed themselves as removed from politics their work contributed to the key geopolitical agendas of the day The paths traveled by the experts in this volume not only traversed Latin America and connected Latin America to the Global North they also stretch traditional chronologies of the Latin American Cold War to show how local experts in the early twentieth century laid the foundation for post World War II development projects and how Cold War knowledge of science technology and the environment continues to impact our world today These essays unite environmental history and the history of science and technology to argue for the importance of expertise in the Latin American Cold War

The Oxford Handbook of Agricultural History Jeannie M. Wayne, 2024 Agricultural history has enjoyed a rebirth in recent years in part because the agricultural enterprise promotes economic and cultural connections in an era that has become ever more globally focused but also because of agriculture's potential to lead to conflicts over precious resources The Oxford Handbook of Agricultural History reflects this rebirth and examines the wide reaching implications of agricultural issues featuring essays that touch on the green revolution the development of the Atlantic slave plantation the agricultural impact of the American Civil War the rise of scientific and corporate agriculture and modern exploitation of agricultural labor

Earth Capital Alessandro Stanziani, 2025-10-15 This book is a major new history of capitalism that takes account of the material and ecological underpinnings of productive activity as well as the social political and institutional dimensions of economic life It retraces the history of capitalism over a long time period giving particular attention to the role of food agriculture energy and natural resources and with an eye to the future mindful of the need to find solutions to an ecological crisis that threatens to overwhelm us all Alessandro Stanziani shows that the development of capitalism since the twelfth century has been based on two primary forms of exploitation of labour often

coerced and of what he calls Earth capital by which he means both the planet as a whole and its land and natural resources as factors of production While these two forms of exploitation have gone hand in hand the emphasis has shifted over time forced labour gradually declined in importance from 1870 to the present the exploitation of land fossil fuels and natural resources grew at an unprecedented rate from 1870 to unprecedented rate the destructive consequences of which are becoming increasingly apparent today Looking to the future Stanziani argues that in order to deal with the immense challenges we now face we must be prepared radically to rethink our economic and political systems He proposes a new social contract that would make democracy social equality and the environment the three pillars of the world of tomorrow

Interpreting Science at Museums and Historic Sites Debra A. Reid, Karen-Beth G. Scholthof, David D.

Vail, 2023-09-11 Ask not what science can do for you but what public history can do for science Interpreting Science in Museums and Historic Sites stresses the untapped potential of historical artifacts to inform our understanding of scientific topics It argues that science gains ground when contextualized in museums and historic sites Engaging audiences in conversations about hot topics such as health and medical sciences or climate change and responses to it mediated by a history museum can emphasize scientific rigor and the time lag between discovery and confirmation of societal benefit Interpreting Science emphasizes the urgency of this work provides a toolkit to start and sustain the work shares case studies that model best practice and resources useful to facilitate and sustain a science infused public history [Animal Industries](#) Taina Syrjämaa, Marja Jalava, Taija Kaarlenkaski, Otto Latva, Eeva Nikkilä, Tuomas Räsänen, 2024-04-01 This book examines an extremely topical phenomenon the massive industrial exploitation of animals from a previously neglected perspective It explores the history and development of animal industries in Nordic countries from their establishment in the late nineteenth century to the present day These countries are often considered to be progressive and advanced in animal protection but consumption practices in this area are actually excessive in relation to planetary resources and are among the most unsustainable on a global scale If we want to understand current problems it is essential to be aware of long term changes and continuities as well as the diversity of animals that have been exploited The purpose of this book is to explain these changes and provide new knowledge for scholars in human animal studies decisionmakers and the general public
