Smith, 2017-07-05 During the period in which Expressionist artists were active in central Europe art historians were producing texts which also began to be characterized evocatively as expressionist yet the notion of an expressionist art history has yet to be fully explored in historiographic studies of the discipline This anthology offers a cross section of noteworthy art history texts that have been described as expressionist along with critical commentaries by an international group of scholars Written between 1912 and 1933 the primary sources have been selected from the published scholarship of both recognized and less familiar figures in the field's Germanic tradition Wilhelm Worringer Fritz Burger Ernst Heidrich Max Dvor Heinrich W. Ifflin and Carl Einstein Translated here for the first time these examples of an expressionist turn in art history along with their secondary

analyses and the book's introduction offer a productive lens through which to re-examine the practice and theory of art history in the early twentieth century

Fictions of Art History Mark Ledbury, 2013-10-28 DIV Fictions of Art History the most recent addition to the Clark Studies in the Visual Arts series addresses art history's complex relationships with fiction poetry and creative writing Inspired by a 2010 conference the volume examines art historians viewing practices and modes of writing How the contributors ask are we to unravel the supposed facts of history from the fictions constructed in works of art How do art historians employ or resist

devices of fiction and what are the effects of those choices on the reader In styles by turns witty elliptical and plain speaking the essays in *Fictions of Art History* are fascinating and provocative critical interventions in art history div **Art, History, and Postwar Fiction** Kevin Brazil, 2018-10-24 *Art History and Postwar Fiction* explores the ways in which novelists responded to the visual arts from the aftermath of the Second World War to the present day If art had long served as a foil to enable novelists to reflect on their craft this book argues that in the postwar period novelists turned to the visual arts to develop new ways of conceptualizing the relationship between literature and history The sense that the novel was becalmed in the end of history was pervasive in the postwar decades In seeming to bring modernism to a climax whilst repeating its foundational gestures visual art also raised questions about the relationship between continuity and change in the development of art In chapters on Samuel Beckett William Gaddis John Berger and W G Sebald and shorter discussions of writers like Doris Lessing Kathy Acker and Teju Cole this book shows that writing about art was often a means of commenting on historical developments of the period the Cold War the New Left the legacy of the Holocaust Furthermore it argues that forms of postwar visual art from abstraction to the readymade offered novelists ways of thinking about the relationship between form and history that went beyond models of reflection or determination By doing so this book also argues that attention to interactions between literature and art can provide critics with new ways to think about the relationship between literature and history beyond reductive oppositions between formalism and historicism autonomy and context *German Art History and Scientific Thought* Mitchell B. Frank, 2017-07-05 A fresh contribution to the ongoing debate between *Kunstwissenschaft* scientific study of art and *Kunstgeschichte* art history this essay collection explores how German speaking art historians of the late nineteenth and early twentieth century self consciously generated a field of study Prominent North American and European scholars provide new insights into how a mixing of diverse methodologies took place in order to gain a more subtle and comprehensive understanding of how art history became institutionalized and legitimized in Germany One common assumption about early art historical writing in Germany is that it depended upon a simplistic and narrowly defined formalism This book helps to correct this stereotype by demonstrating the complexity of discussion surrounding formalist concerns and by examining how German speaking art historians borrowed incorporated stole and made analogies with concepts from the sciences in formulating their methods In focusing on the work of some of the well known fathers of the discipline such as Alois Riegl and Heinrich Wölfflin as well as on lesser known figures the essays in this volume provide illuminating and sometimes surprising treatments of art history's prior and understudied interactions with a wide range of scientific orientations from psychology sociology and physiognomics to evolutionism and comparative anatomy
