Artificial Landscape Contemporary Architecture Urbanism:

The Artificial Landscape Anne Hoogewoning, 2000 The architecture and architectural culture of the Netherlands have been causing quite a stir in recent years a great many remarkable new buildings and projects testify to the current flowering in Dutch architecture urban planning and landscaping that is so exciting to so many in and out of the field *Artificial Landscape* illustrates the results of this late twentieth century surge of creativity and traces the background of its success examining both the Dutch phenomenon and its socio historical context to find out what makes it work so well What we find is that even in a period of globalization there is still such a thing as a Dutch climate yet despite this culture's specific national character we have much to learn from it particularly where its unique synthesis of architecture urbanism and landscaping is concerned This exciting movement is represented by a selection of designs built works ideas plans and manifestoes from such architects and firms as OMA Rem Koolhaas Neutelings Riedijk MVRDV Maunse Nio and Max 1 to name only a few Apart from recording the state of things in Dutch architecture *Artificial Landscape* also serves as a survey of contemporary architectural criticism collecting the most important critiques of Dutch architecture urban planning and landscape architecture to have appeared in recent years

The Landscape Urbanism Reader Charles Waldheim, 2012-03-20 In *The Landscape Urbanism Reader* Charles Waldheim who is at the forefront of this new movement has assembled the definitive collection of essays by many of the field's top practitioners Fourteen essays written by leading figures across a range of disciplines and from around the world including James Corner Linda Pollak Alan Berger Pierre Bolanger Julia Czerniak and more capture the origins the contemporary milieu and the aspirations of this relatively new field *The Landscape Urbanism Reader* is an inspiring signal to the future of city making as well as an indispensable reference for students teachers architects and urban planners

The New Architectural Pragmatism William S. Saunders, 2007 In response to the contentious process surrounding the selection of a design for the World Trade Center site the use of spectacular buildings to brand cities and institutions and the dizzying transformations of the skylines of Shanghai and Dubai public awareness of architecture and design has perhaps never been higher At the same time architecture itself is undergoing an identity crisis as it confronts fundamental issues the effect of digital technology on design the pervasive impact of global capitalism and whether to embrace or resist popular media and taste *The New Architectural Pragmatism* collects the most provocative penetrating and influential attempts by leading theorists and practitioners in the field to define what architectural practice should be at the beginning of the twenty first century Written in the aftermath of modernism's utopian impulse and postmodernism's detached playfulness the essays gathered here express and critique a new spirit of cultural and political engagement with contemporary society Interrogating the architect's social responsibility the contributors deliberate about how much we should ask of architecture and suggest that in the coming century architecture must be at once flexible and robust responsive and self directed Contributors Stan Allen George Baird Lucy Bullivant James Corner Hal Foster Kenneth

strategic urbanism or landscape urbanism Compared with global interpretations of urbanism based on socioeconomic history or architectural historiography *Urban Visions From Planning Culture to Landscape Urbanism* aims to present the discipline couched in international contemporary debate and adopt a historic and comparative perspective The book s contents pertain equally to other related disciplines such as architecture urban history urban design landscape architecture and geography Foreword by Rafael Moneo Staging Urban Landscapes B. Cannon Ivers,2018-10-08 Open urban spaces are an ideal stage for public events An important prerequisite for their design in an increasingly heterogeneous multicultural cityscape is the relationship between design use and social function The book documents both temporary as well as permanent installations of various kinds from the open air courtyard of a museum to the design of a river bank promenade through to a city park

New Directions in Contemporary Architecture Luigi Prestinenza Puglisi,2008-05-05 Rem Koolhaas has defined architecture as a chaotic adventure Nothing could be more true than that of the last two decades Never has architecture been so unbridled and so extraordinary the architectural cast has never been so wide and their works so diverse What though if you are new to the subject How is it possible to make sense of this seemingly unruly architectural landscape There are so many different types of architecture so many designers with such varying and even contradictory approaches This book is a much needed navigation guide for anyone interested in modern architecture Organised chronologically it enables you to find your way through one of the most prolific periods of building design It looks at buildings in often contrasting styles that have been built almost simultaneously across the world with their roots in very different tendencies and schools of thought A loose but effective framework is provided which pulls all these multiple threads together while key buildings are described individually with a unique clarity and precision Aaron Betsky Director of Cincinnati Art Museum Comprehensive coherent and cogent Puglisi s book sorts out the messy history of the last quarter century of the world s best architecture Professor Iain Borden Head Bartlett School of Architecture UCL Illuminating and insightful a must have read for students Hans Ibelings Editor of *A10 new European architecture* Lucid and concise Charles Jencks Architecture Critic and Author A compelling comprehensive overview of the avant garde since 1988 as it oscillates in and out of the global star system Bill Menking Editor of *The Architect s Newspaper* This is the first clear and systematic study of the culture of architecture from the reds of deconstruction to the sustainable greens Beyond the Edge Raymond Gastil,2002-10-25 Through an insightful look at projects from around the world and at the current design proposals for New York itself the author paints a portrait of redevelopment that is both pragmatic and visionary one that holds the promise of reconnecting New Yorkers to their waterfront as a vital place of work and of public life BOOK JACKET
