Arranging and Composition Techniques: Song Construction and Arrangement Young-Hwan Yeo,Mohd Nasir Hashim,2009-11-25 Research Paper undergraduate from the year 2005 in the subject Musicology Miscellaneous The University of Malaya Music Department course Scholarly Research Paper language English abstract In the early days of the pop industry roles were more clearly defined Songs were composed by songwriters vocal and orchestral performances were extracted by producers and the results recorded and mastered by audio engineers The arranger s task was to translate the chords and melodies into an orchestral score which could then be performed in one take by a team of musicians Today of course the modern palette of sounds is no longer limited to classical instruments and arranging is often an integral part of the songwriting and production process An incredible array of synthesisers samplers and other tools is now available to aid the creative process and digital technology allows us to shuffle the entire sections of music around until a perfect format is achieved In pop music above all the role of an arranger has merged with those of a musician programmer producer and writer to become a vital part of the creative process For me arranging is primarily about creating moods A good arrangement should hook the listener from the introduction and hold their attention through the song as the parts and melodies develop Sounds and chord structures should work together to surround the vocal and evoke the appropriate emotions Everyone has their own way of achieving this and there can never be an ultimate arrangement for any track experimentation is the key Songs can evolve from a wide range of starting points You may be working from a demo with many of the parts already defined or you may have just a title Either way it s good to start by taking an objective step back Imagine how the song might sound on your car radio or your old radio at home What sounds would grab your attention and make you turn the radio up As the music continues which melodies fill your mind and keep you enthralled Try to translate your ideas into reality as quickly

as possible The more you work on a song the less objective you become and your first impressions are often correct You might listen to a track thousands of times as you work on it but the general public will be lucky to hear it a couple of times on the radio before it drops from the playlist *Keyboard* ,1987
