Artificial Dreams The Quest For Non Biological Intelligence:

Artificial Dreams H. R. Ekbia, 2008-04-21 This book is a critique of Artificial Intelligence AI from the perspective of cognitive science it seeks to examine what we have learned about human cognition from AI successes and failures The book's goal is to separate those AI dreams that either have been or could be realized from those that are constructed through discourse and are unrealizable AI research has advanced many areas that are intellectually compelling and holds great promise for advances in science engineering and practical systems After the 1980s however the field has often struggled to deliver widely on these promises This book breaks new ground by analyzing how some of the driving dreams of people practicing AI research become valued contributions while others devolve into unrealized and unrealizable projects

Artificial Dreams Hamid Reza Ekbia, 2014-05-14 **A Networked Self and Human Augmentics, Artificial Intelligence, Sentience** Zizi Papacharissi, 2018-07-11 Every new technology invites its own sets of hopes and fears and raises as many questions as it answers revolving around the same theme Will technology fundamentally alter the essence of what it means to be human This volume draws inspiration from the work of the many luminaries who approach augmented alternative forms of intelligence and consciousness Scholars contribute their thoughts on how human augmentic technologies and artificial or sentient forms of intelligence can be used to enable reimagine and reorganize how we understand our selves how we conceive the meaning of human and how we define meaning in our lives **Beyond Artificial Intelligence** Jozef Kelemen, Jan Romportl, Eva Zackova, 2012-10-20 Products of modern artificial intelligence AI have mostly been formed by the views opinions and goals of the insiders i.e. people usually with engineering background who are driven by the force that can be metaphorically described as the pursuit of the craft of Hephaestus However since the present day technology allows for tighter and tighter mergence of the natural everyday human life with machines of immense complexity the responsible reaction of the scientific community should be based on cautious reflection of what really lies beyond AI i.e. on the frontiers where the tumultuous ever growing and ever changing cloud of AI touches the rest of the world The chapters of this book are based on the selected subset of the presentations that were delivered by their respective authors at the conference Beyond AI Interdisciplinary Aspects of Artificial Intelligence held in Pilsen in December 2011 From its very definition the reflection of the phenomena that lie beyond AI must be inherently interdisciplinary And so is this book all the authors took part in a mutual transdisciplinary dialogue after explaining their views on AI not only to a narrow selection of their usual close peers with the same specialisation but to a much broader audience of various experts from AI engineering natural sciences humanities and philosophy The chapters of this book thus reflect results of such a dialogue *Handbook of Critical Studies of Artificial Intelligence* Simon Lindgren, 2023-11-03 As artificial intelligence AI continues to seep into more areas of society and culture critical social perspectives on its technologies are more urgent than ever before Bringing together state of the art research from experienced scholars across disciplines this Handbook provides a comprehensive overview of the current

state of critical AI studies **Beyond Artificial Intelligence** Jan Romportl, Eva Zackova, Jozef Kelemen, 2014-08-11 This book is an edited collection of chapters based on the papers presented at the conference Beyond AI Artificial Dreams held in Pilsen in November 2012 The aim of the conference was to question deep rooted ideas of artificial intelligence and cast critical reflection on methods standing at its foundations Artificial Dreams epitomize our controversial quest for non biological intelligence and therefore the contributors of this book tried to fully exploit such a controversy in their respective chapters which resulted in an interdisciplinary dialogue between experts from engineering natural sciences and humanities While pursuing the Artificial Dreams it has become clear that it is still more and more difficult to draw a clear divide between human and machine And therefore this book tries to portrait such an image of what lies beyond artificial intelligence we can see the disappearing human machine divide a very important phenomenon of nowadays technological society the phenomenon which is often uncritically praised or hypocritically condemned And so this phenomenon found its place in the subtitle of the whole volume as well as in the title of the chapter of Kevin Warwick one of the keynote speakers at Beyond AI Artificial Dreams **Artificial Intelligence and Soft Computing, Part II** Leszek Rutkowski, Rafał Scherer, Ryszard Tadeusiewicz, Lotfi A. Zadeh, Jacek M. Zurada, 2010-06 This volume constitutes the proceedings of the 10th International Conference on Artificial Intelligence and Soft Computing ICAISC 2010 held in Zakopane Poland in June 13 17 2010 The articles are organized in topical sections on Fuzzy Systems and Their Applications Data Mining Classification and Forecasting Image and Speech Analysis Bioinformatics and Medical Applications Volume 6113 together with Neural Networks and Their Applications Evolutionary Algorithms and Their Applications Agent System Robotics and Control Various Problems aof Artificial Intelligence Volume 6114 The Oxford Handbook of Material Culture Studies Dan Hicks, Mary C. Beaudry, 2010-09-02 Written by an international team of experts the Handbook makes accessible a full range of theoretical and applied approaches to the study of material culture and the place of materiality in social theory presenting current thinking about material culture from the fields of archaeology anthropology geography and science and technology studies When Technocultures Collide Gary Genosko, 2013-10-25 When Technocultures Collide provides rich and diverse studies of collision courses between technologically inspired subcultures and the corporate and governmental entities they seek to undermine The adventures and exploits of computer hackers phone phreaks urban explorers calculator and computer collectors BlackBerry users whistle blowers Yuppies zinsters roulette cheats chess geeks and a range of losers and tinkerers feature prominently in this volume Gary Genosko analyzes these practices for their remarkable diversity and their innovation and leaps of imagination He assesses the results of a number of operations including the Canadian stories of Mafiaboy Jeff Chapman of Infiltration and BlackBerry users The author provides critical accounts of highly specialized attributes such as the prospects of deterritorialized computer mice and big toe computing the role of electrical grid hacks in urban technopolitics and whether info addiction and depression contribute to tactical resistance Beyond resistance however the

goal of this work is to find examples of technocultural autonomy in the minor and marginal cultural productions of small cultures ethico poetic diversions and sustainable withdrawals with genuine therapeutic potential to surpass accumulation debt and competition The dangers and joys of these struggles for autonomy are underlined in studies of RIM s BlackBerry and Julian Assange s WikiLeaks website *The Tone of Our Times* Frances Dyson, 2014-09-26 Sound tone music voice and noise as forms of sonority through which our current economic and ecological crises can be understood In this wide ranging book Frances Dyson examines the role of sound in the development of economic and ecological systems that are today in crisis Connecting early theories of harmony cosmology and theological doctrine to contemporary media and governance Dyson uses sound tone music voice and noise as forms of sonority through which the crises of eco can be read The sonic environment Dyson argues is fundamental to both sense and sensibility and its delimitation has contributed to the senselessness of a world now caught between spiraling debt and environmental degradation Dyson draws on scenes historical moments artworks and artistic and theoretical practice to situate the reverberative atmosphere that surrounds and sustains us From Pythagoras s hammer and the transmutation of music into mathematics to John Cage s famous experience in the anechoic chamber to the relocation of the stock market from the street to the computer screen to Occupy Wall Street s people s microphone Dyson finds policies and practices of exclusion The sound of Pythagoras s forge and the rabble of the market have been muted rearticulated and transformed Dyson argues through the monotones of media the racket of financialization and the gibberish of political speech Informed by contemporary sound art philosophy media and sociopolitical theory *The Tone of Our Times* offers insights into present crises that are relevant to a broader understanding of how space the aural and listening have shaped and continue to shape the world we live in
