At The Root Of Things The Subatomic World:

At the Root of Things Palash Baran Pal,2014-08-27 At the Root of Things The Subatomic World is a journey into the world of elementary particles the basic constituents of all matter in the universe and the nature of the interactions among them The book begins with a summary of pre quantum physics and later tackles quantum physics which is essential for the study of elementary particles It is written in a non technical way so that anyone interested about these issues will be able to read it All and all this is a book that not only helps outsiders understand the subject in a non mathematical manner it also inspires them to join the exciting endeavor It contains many line diagrams to illustrate the ideas and a few mathematical equations like $E = mc^2$

At the Root of Things the Subatomic World Russell Duffy,2017-03-08 The book begins with a summary of pre quantum physics and later tackles quantum physics which is essential for the study of elementary particles The book discusses the emergence of quantum theory from studies in heat radiation and the photoelectric effect as well as developments that led to the concept of duality between particles and waves Also discussed is how quantum theory helped to better understand the structure of atoms and the discovery of particles that were not constituents of atoms such as the positron and the muon

DECODING STARLIGHT: AN ELEMENTARY TALE OF GENESIS Dr. Sudipta Das, Our Universe is majestic magnificent in its splendour and deeply mysterious at the same time Throughout this book we shall try to act as Cosmic Detectives Through careful observation of some very elementary clues scattered across the sky we try to gradually discover some of the deepest and darkest secrets or mysteries of the Universe From our familiar shoreline on the Earth we dare to venture into the harrowing depths of vast unknown Cosmic abyss Believe me it will be a fascinating journey indeed

Old Souls Thomas Shroder,2011-05-17 A riveting firsthand account of one man's mission to investigate and document some of the most astonishing phenomena of our time children who speak of past life memory and reincarnation All across the globe small children spontaneously speak of previous lives beg to be taken home pine for mothers and husbands and mistresses from another life and know things that there seems to be no normal way for them to know From the moment these children can talk they speak of people and events from the past not vague stories of centuries ago but details of specific identifiable individuals who may have died just months weeks or even hours before the birth of the child in question For thirty seven years Dr Ian Stevenson has traveled the world from Lebanon to suburban Virginia

investigating and documenting more than two thousand of these past life memory cases Now his essentially unknown work is being brought to the mainstream by Tom Shroder the first journalist to have the privilege of accompanying Dr Stevenson in his fieldwork Shroder follows Stevenson into the lives of children and families touched by this phenomenon changing from skeptic to believer as he comes face to face with concrete evidence he cannot discount in this spellbinding and true story

The Root of Heaven and Earth E. A. Grace, 2013 A story spanning worlds and centuries from a distant destitute future and the ambitions of a young scientist to the possibility of a thriving tomorrow from the dreams of a young village girl in India to the broad vistas of the American West from a rain drenched African jungle and the mighty Congo that flows through it to a seed of understanding that could transform a world This epic tale unravels mysteries arising out of our deepest past and offers a glimpse of the surprising promise that lies ahead

The Idea of Man Mark Aman, 2018-04-03 The Idea of Man presents a new ontology or idea of human being by developing the logic that naturally flows from that which is original necessary inherent and essential to this being upright posture The verticality of man simply and mutely constituted by his innate uprightness is taken as the ontological key to understanding the idea of man the world of language and the very possibility of Being itself In this the book conceives in unison both an Ontological Anthropology and an Anthropological Ontology

Realism and Anti-Realism Stuart Brock, Edwin Mares, 2014-12-18 There are a bewildering variety of ways the terms realism and anti realism have been used in philosophy and furthermore the different uses of these terms are only loosely connected with one another Rather than give a piecemeal map of this very diverse landscape the authors focus on what they see as the core concept realism about a particular domain is the view that there are facts or entities distinctive of that domain and their existence and nature is in some important sense objective and mind independent The authors carefully set out and explain the different realist and anti realist positions and arguments that occur in five key domains science ethics mathematics modality and fictional objects For each area the authors examine the various styles of argument in support of and against realism and anti realism show how these different positions and arguments arise in very different domains evaluate their success within these fields and draw general conclusions about these assorted strategies Error theory fictionalism non cognitivism relativism and response dependence are taken as the most important positions in opposition to the realist and these are explored in depth Suitable for advanced level undergraduates the book offers readers a clear introduction to a subject central to much contemporary work in metaphysics epistemology and philosophy of language

Illumination the religion of the Ancient Order of the Illuminati began with Pythagoras and is the world's only Logos religion i.e. a rational religion founded on mathematics science and philosophy It has no connection with Mythos religions such as Judaism Christianity and Islam Illumination is the Grand Unified Theory of Everything linking science religion psychology philosophy and even the paranormal It does so via the only medium of truth and absolute knowledge mathematics which

Pythagoras enigmatically declared to be the arche the fundamental substance of existence Whereas science is based on mathematical materialism Illumination uses Leibnizian mathematical idealism This is one of a series of books providing the ultimate answers to the nature of existence
