Brethericks Handbook Of Reactive Chemical Hazards Sixth Edition:

Bretherick's Handbook of Reactive Chemical Hazards L. Bretherick, 1990 Bretherick's Handbook of Reactive Chemical Hazards P. G. Urban, 2007 Bretherick's Handbook of Reactive Chemical Hazards is widely regarded as the reference work in this field an assembly of all reported risks such as explosion fire toxic or high energy events that result from chemical reactions gone astray with extensive referencing to the primary literature It is designed to improve safety in laboratories that perform chemical synthesis and general research as well as chemical manufacturing plants Entries are ordered by empirical formula and indexed under both names and Chemical Abstracts Registry Numbers This two volume compendium focuses on reactivity risks of chemicals alone and in combination toxicity hazards are only included for unexpected reactions giving volatile poisons **Bretherick's Handbook of Reactive Chemical Hazards** L. Bretherick, 2013-10-22 Bretherick's Handbook of Reactive Chemical Hazards Fourth Edition provides information pertinent to the reactive hazards associated with the use of chemicals This book discusses the development of the technologies particularly in the area of safety research Organized into two chapters this edition begins with an overview of the advantages to be gained in grouping together elements or compounds showing similar reactivity or structure This text then explores the underlying principles and practical aspects of minimizing reactive chemical hazards Other chapters consider the rate of an exothermic chemical reaction which determines the rate of energy release This book discusses as well the factors that affect reaction kinetics which are significant in relation to possible reaction hazards The final chapter deals with reactions at high temperature that may be exceptionally hazardous attributed to the enhanced kinetic energy content of the system This book is a valuable resource for chemists Safety officers who are tasked for safety in industrial laboratories will also find this book extremely useful Bretherick's Handbook of Reactive Chemical Hazards Peter Urban, 2017-03-18 Bretherick's Handbook of Reactive Chemical Hazards Eighth Edition presents the latest updates on the unexpected but predictable loss of containment and explosion hazards from chemicals and their admixtures and actual accidents The extensively cross referenced book enables readers to avoid explosion and loss of containment of chemicals Primary and more specialized sources are easily traced and this new edition includes available record updates also adding a number of new records In this newly updated and expanded edition the content is presented in a clear and user friendly format Includes new pure compound class of compounds records and updates on all existing records Presents a worldwide unique reference work on chemical reactive hazards Lists important hazardous reactions and includes references to real chemical incidents Provides guidelines on the safe use and handling of chemicals In the lab and industry Bretherick's Handbook of Reactive Chemical Hazards L. Bretherick, 1990 Bretherick's Handbook of Reactive Chemical Hazards Peter Urban, 2016-06-23 Bretherick is widely accepted as the reference work on reactive chemical hazards and is essential for all those working with chemicals It attempts to include every chemical for which documented information on reactive hazards has been found The text covers over 5000

elements and compounds and as many again of secondary entries involving two or more compounds One of its most valuable features is the extensive cross referencing throughout both sections which links similar compounds or incidents not obviously related The fifth edition has been completely updated and revised by the new Editor and contains documented information on hazards and appropriate references up to 1994 although the text still follows the format of previous editions Volume 1 is devoted to specific information on the stability of the listed compounds or the reactivity of mixtures of two or more of them under various circumstances Each compound is identified by an UPAC based name the CAS registry number its empirical formula and structure Each description of an incident or violent reaction gives reference to the original literature Each chemical is classified on the basis of similarities in structure or reactivity and these groups are listed alphabetically in Volume 2 The group entries contain a complete listing of all the compounds in Volume 1 assigned to that group to assist cross referral to similar compounds Volume 2 also contains hazard topic entries arranged alphabetically some with lists Appendices include a fire related data table for higher risk chemicals indexes of registry numbers and chemical names as well as reference abbreviations and a glossary
