Brigrance Math Placement Test:

Multiple Perspectives on Difficulties in Learning Literacy and Numeracy Claire Wyatt-Smith, John Elkins, Stephanie Gunn, 2010-10-28 There are many approaches to researching the difficulties in learning that students experience in the key areas of literacy and numeracy This book seeks to advance understanding of these difficulties and the interventions that have been used to improve outcomes The book addresses the sometimes complementary and sometimes contradictory results and generates new approaches to understanding and serving students with difficulties in literacy and numeracy The book represents a departure from conventional wisdom as most scholars and graduate students draw upon ideas from only one of the three domains focal in the book and usually from one single or dominant theoretical frame Typically readers will affiliate with reading education mathematics education or learning disabilities and belong to one of the corresponding professional associations such as IRA NCTM or CLD This book s scope will open a scholarly forum for engaging readers with a familiarity with one of these domains while providing insight into the others on offer in the book

Forensic Mental Health Assessment Kirk Heilbrun, David DeMatteo, Stephanie Brooks Holliday, Casey LaDuke, 2014 Forensic mental health assessment FMHA continues to develop and expand as a specialization Since the publication of the First Edition of Forensic Mental Health Assessment A Casebook over a decade ago there have been a number of significant changes in the applicable law ethics science and practice that have shaped the conceptual and empirical underpinnings of FMHA The Second Edition of Forensic Mental Health Assessment is thoroughly updated in light of the developments and changes in the field while still keeping the unique structure of presenting cases detailed reports and specific teaching points on a wide range of topics Unlike anything else in the literature it provides genuine although disguised case material so trainees as well as legal and mental health professionals can review how high quality forensic evaluation reports are written it features contributions from leading experts in forensic psychology and psychiatry providing samples of work in their particular areas of specialization and it discusses case material in the larger context of broad foundational principles and specific teaching points making it a valuable resource for teaching training and continuing education Now featuring 50 real world cases this new edition covers topics including criminal responsibility sexual offending risk evaluation federal sentencing capital sentencing capacity to consent to treatment personal injury harassment and discrimination guardianship juvenile commitment transfer and decertification response style expert testimony evaluations in a military context and many more It will be invaluable for anyone involved in assessments for the courts including psychologists psychiatrists social workers and attorneys as well as for FMHA courses
