African Politics

Toyin Falola,2025-11-25 African Politics An Introduction is an engaging broad ranging

guide to the politics of African states reflecting on contemporary patterns and trends whilst also situating them in their historical context Viewed from the outside African politics are often said to be too complex and multifarious to understand properly leading to widespread misunderstandings and stereotypes This book challenges these assumptions providing an accessible reader friendly guide Starting with an introduction to the historical roots of African politics right back to the precolonial era this book goes on to discuss colonialism and the independence movement before diving into the postcolonial state and the challenges of governance development and conflict which many states have struggled with This book looks in detail at the various actors involved from religious groups to political parties youth politics women social movements and different social classes At the end of each chapter a classwork box provides students with a particular example of an African state or event to investigate in more detail encouraging them to consider the specific and to resist generalizations African Politics An Introduction is perfect for an undergraduate student starting out in their studies of African politics but it would also be a welcome read for any reader who wants to learn a bit more about the governance of Africa Colonization and Epistemic Injustice in Higher Education Felix Maringe,2023-03-08 Providing coherence in understanding the role that education and higher education played in the colonizing purposes of the rich nations of the North this book draws from multiple geopolitical spaces across the world to consider how epistemic injustice has characterized colonial higher education systems Within this text carefully chosen international contributors explore how colonialism coloniality and colonization have impacted indigenous people s ways of knowing feeling behaving valuing being and becoming in fundamental ways and how the West s idea of education and schooling have been used as key instruments in the project of world domination and subjugation Beyond these key entry concepts chapters use ideas of modernity post modernism globalization internationalization and neo liberalism to examine how higher education in colonial and post colonial societies still answers to a colonial narrative and what can be done to decolonize the system Unpacking the historical and philosophical antecedents of higher education and critically examining the intentions and impact of colonial assumptions behind higher education in different parts of the world this is suitable reading for postgraduates and scholars in the field of higher education as well as senior management teams in universities and practitioners who work directly in the field of transformation in government and university departments International Development Bruce Currie-Alder,Ravi Kanbur,David M. Malone,Rohinton Medhora,2014 A central premise is that an objective and universally accepted measure of success in development and paths to it does not exist Rethinking Heritage for Sustainable Development Sophia Labadi,2022-06-06 The Sustainable Development Goals SDGs adopted by the UN in 2015 have influenced the actions of international and intergovernmental organisations and governments around the world and have dictated priorities for international aid spending Culture including heritage is often presented as fundamental to addressing the SDGs since 2010 the United Nations has adopted no fewer than five major policy recommendations that assert its importance as a driver and enabler of development Yet heritage is

marginalized from the Sustainable Development Goals Rethinking Heritage for Sustainable Development constitutes a substantial and original assessment of whether and how heritage has contributed to three key dimensions of sustainable development namely poverty reduction gender equality and environmental sustainability within the context of its marginalisation from the Sustainable Development Goals and from previous international development agendas Sophia Labadi adopts a novel inclusive large scale and systematic approach providing the first comprehensive history of the international approaches on culture including heritage for development from 1970 to the present day This book is also the first to assess the negative and positive impacts of all the international projects implemented in sub Saharan Africa by a consortium of UN organisations that aimed to provide evidence for the contribution of heritage for development in time for the negotiation of the SDGs The book s conclusions provide recommendations for rethinking heritage for development while reflecting on the major shortcomings of the selected projects
