Artificial Intelligence Illuminated Jones And Bartlett Illuminated:

Artificial Intelligence Illuminated Ben Coppin, 2004 Artificial Intelligence Illuminated presents an overview of the background and history of artificial intelligence emphasizing its importance in today's society and potential for the future. The book covers a range of AI techniques, algorithms, and methodologies including game playing, intelligent agents, machine learning, genetic algorithms, and Artificial Life. Material is presented in a lively and accessible manner, and the author focuses on explaining how AI techniques relate to and are derived from natural systems such as the human brain and evolution, and explaining how the artificial equivalents are used in the real world. Each chapter includes student exercises and review questions, and a detailed glossary at the end of the book defines important terms and concepts highlighted throughout the text.

Intelligent Systems Crina Grosan, Ajith Abraham, 2011-07-29 Computational intelligence is a well-established paradigm where new theories with a sound biological understanding have been evolving. The current experimental systems have many of the characteristics of biological computers: brains in other words, and are beginning to be built to perform a variety of tasks that are difficult or impossible to do with conventional computers. As evident, the ultimate achievement in this field would be to mimic or exceed human cognitive capabilities including reasoning, recognition, creativity, emotions, understanding, learning, and so on. This book, comprising of 17 chapters, offers a step-by-step introduction in a chronological order to the various modern computational intelligence tools used in practical problem solving. Starting with different search techniques including informed and uninformed search, heuristic search, minmax, alpha-beta pruning, methods, evolutionary algorithms, and swarm intelligent techniques, the authors illustrate the design of knowledge-based systems and advanced expert systems which incorporate uncertainty and fuzziness. Machine learning algorithms including decision trees and artificial neural networks are presented, and finally the fundamentals of hybrid intelligent systems are also depicted. Academics, scientists, as well as engineers engaged in research, development, and application of computational intelligence techniques, machine learning, and data mining would find the comprehensive coverage of this book invaluable.

Strategic Management Okechukwu Lawrence Emeagwali, Hasan Yousef Aljuhamni, 2019-11-13 Through select contributions, this edited volume presents a current discourse on strategic management specifically through the lens of industry dynamism. It re-examines the enduring call for dynamic strategies and capabilities at the firm and industry level, drawing case studies from a diverse array of geographic locations. Its findings are presented in two succinct sections: On Dynamic Strategies and On Dynamic Capabilities, which collectively read as a unit.
