

AP World History Modern Unit 5 Reading Guide for AMSCO

Key Ideas from this section:

- As empires expanded and trade routes led to more interactions—scientists, philosophers, and political thinkers in the 17th and 18th centuries began to emphasize A. reason and logic over traditional beliefs and B. individual rights over community commitments. The ideals of this movement, such as individual rights and private control of land/businesses, challenged the roles of rulers and church leadership, planted the seeds of major political revolutions.
- Following the Scientific Revolution and the birth of the Enlightenment, Enlightenment thinking led to two movements: positive/progressive. Many writers believed that applying reason/logic to government and society would result in progress. While not denying the existence of God, they emphasized human accomplishments in understanding the natural world.
- The clash between new progressive or liberal ideas VS old political structures (conservative ideas) led to revolutions that often had two aims: independence from imperial powers; temporal and constitutional representation (more democracy). This decline of empires and the emergence of new forms of government often followed.
- In Europe and America, Enlightenment thinkers reacted to the social problems caused by increasing urbanization (growth of cities) and industrialization (factory production). Poverty in the cities increased; their workers lived in slums without proper sanitation and without political representation. Various writers proposed solutions for these problems including government regulations and charity programs. Others blamed the poor themselves and called on them to change their situation on their own.
- New political ideas that grew out of this time period (1750–1800) included increased rights and equality for women, minority groups, and the labor classes.

Unit 5.1 -The Enlightenment
