The role of your provincial or territorial Association is to:

- a. Protect the public.
- b. Control the quality of work by a Professional Engineer or Geoscientist
- c. Discipline practicing professionals that do not follow the Code of Ethics
- d. All of the above. -ANSWER The Answer is d.

"All of the above" are true, but the literature clearly states that protecting the public is the most important role.

Your employer is disposing of waste material in the Saskatchewan River. There are no specific regulations about this waste material, yet you feel this is placing the environment, and possibly the public, at risk.

What is the first step your Association would advise you to take?

- a. Blow the whistle on your employer
- b. Report the concern to your Department Manager
- c. Report your employer to your Association
- d. Report your employer to the legal authority -ANSWER The most correct answer is b - to report the concern to your Department Manager.

How do we know this is most correct?

The question is asking us to choose a first step. Don't fall for the trap of deciding what's best for the environment.

A clue to the question is that we are not given many details. So there's not enough information available to reach out to an authority and report a wrongdoing.

Another clue is that blowing the whistle or reporting the act to an authority is used as a last resort. The literature teaches us to gather information or start a discussion first. So a tricky question since they used the word report to your Department Manager.

RED HOT EXAM TIP:

Realize that ethical dilemmas rarely have a correct answer. The literature teaches us to apply a method and step one of that method is information gathering and discussion.

Your organization manages a process where hazardous chemicals may be leached into the soil of a nearby town. This is due to improper practices by the Operations team, and
