Between Freedom and Progress David Prior, 2019-11-04 Between Freedom and Progress recovers and analyzes the global imaginings of Reconstruction's partisans those who struggled over and with Reconstruction as they vied with one another to define the nature of their country after the Civil War The remarkable technological and commercial transformations of the mid nineteenth century in particular steam engines telegraphs and an expanded commercial printing capacity created a constant stream of news description and storytelling from across and beyond the nation Reconstruction's partisans contended with each other to make sense of this information motivated by intense political antagonism combined with a shared but contested set of ideas about freedom and progress As writers lecturers editors travelers moral reformers racists abolitionists politicians suffragists soldiers and diplomats Reconstruction's partisans made competing claims about their place in the world Understanding how why and when they did so helps ground our understanding of Reconstruction itself a mysterious transatlantic term in its own intellectual context Three factors proved pivotal to the making of Reconstruction's world First from 1865 to the early 1870s the interconnected issues of how to remake the Union and how to remake the South exerted a powerful hold on federal politics defining the partisan landscape and inspiring rival arguments about what was possible and what was good The daunting nature of these issues created a sense of crisis across the political spectrum with political discourse ranging in tone from combative to euphoric to apocalyptic Second though domestic in nature these issues were refracted through two broadly held beliefs that the causes of freedom and progress defined history and that distinctive peoples with their own characters composed the world's population These beliefs produced a disposition to think of developments from across and beyond the United States as essentially relatable to each other encouraging an intellectual style that favored wide ranging comparisons Third far from being confined to the elite this mode of thinking and arguing about the world lived and breathed in public texts that were produced and consumed on a weekly and daily basis This commercialized and politicized world of mass publishing was highly unequal in structure and content but it was also impressively vibrant and popular Together these three factors made the world of Reconstruction a global landscape of information argumentation and imagination that derived much of its vigor from domestic political battles
