disappear The painful history of our ancestors and their rich cultural wisdom intertwine within us to create the patterns of our future Even when past trauma remains unspoken or has long been forgotten it becomes part of us and our children a legacy of both strength and woundedness that shapes our lives In this book Tirzah Firestone brings to life the profound impact of protracted historical trauma through the compelling narratives of Israeli terror victims Holocaust survivors and those whose lives were marred by racial persecution and displacement The tragic story of Firestone s own family lays the groundwork for these revealing testimonies of recovery forgiveness and moral leadership Throughout Firestone interweaves their voices with neuroscientific and psychological findings as well as relevant and inspiring Jewish teachings Seven principles emerge from these wise narratives powerful prescriptive tools that speak to anyone dealing with the effects of past injury At the broadest level these principles are directives for staying morally awake in a world rife with terror Midlife Maze Janis Clark Johnston,2017-02-16 Have you found yourself wilting in midlife and wondering what you might do to flourish in your remaining years Have you lost your way in the midlife maze due to a significant loss Did you lose your job or desired career advancement Did you separate or divorce Did your last child leave home Did your family experience a virtual storm of bankruptcy or lose your life savings in a financial meltdown Did you or someone in your family experience the loss of good health Or did you weather the death of a family member partner or friend Your loss story is personal Your path through winding passages during midlife is unique Perhaps the most important encouragement for your grieving process is to know this simple fact grieving is a natural healing response to loss rather than a pathological experience Midlife can be a time of reflection rebellion or reconnecting to old or new interests and activities It can also be a time when losses start to happen or begin to pile up divorce death of a loved one loss of a job or home the moving out and on of grown children and learning how to move forward can be a challenge Here a seasoned psychologist looks at the geography of loss in midlife the way it can affect us and what we can do to get back on track or redirect ourselves when necessary Through first hand stories and practical exercises the author leads readers through the midlife maze to a place of recovery purpose and peace Falling Up Tasha Brooks,2020-04-18 Struggling with life altering trauma Learn how to transform your trauma into triumph Are you struggling to cope with trauma Does happiness feel like a thing of the past Two time cancer survivor Tasha Brooks will show you not only how to cope with your trauma but how to thrive because of it Around the time of her initial diagnosis Tasha s career personal relationships and her health all came crashing down The worst setback of all being diagnosed with thyroid cancer twice in her thirties completely changed the trajectory of her life but not in the negative way you might expect Among other benefits this difficult experience strengthened some of her closest relationships helped her figure out what she wanted in her career and instilled in her a deep sense of gratitude for life In this brief yet powerful account of her experience she will show you exactly how you too can find happiness after a hardship Tasha has learned what all trauma thrivers have in common Through easy to follow techniques that are backed by research Falling Up gives you the tools you need to emerge

from your trauma and grow from it too In this short book you will discover The basic concepts behind growth after trauma Nine practical simple techniques grounded in research that will help you convert your hardships to happiness Additional resources that will allow you to turn your struggles to success We all fall down Growing and thriving after trauma is all about using our disappointments to create a happier fulfilling and more meaningful life It is about transforming our trauma into triumph It is about falling up Buy Falling Up to start your new journey now The Pedagogy of Economic, Political and Social Crises Bob Jessop, Karim Knio, 2018-11-09 Crises have been studied in many disciplines and from diverse perspectives for at least 150 years Yet recent decades have seen a marked increase in the crisis literature reflecting growing awareness of crisis phenomena from the 1970s onwards Responding to this mainstream literature this edited collection makes six key innovations First it distinguishes between crises as event and crises as process as well as crises as accidental events or as the result of system generated processes Second it distinguishes crises that can be managed through established crisis management routines from crises of crisis management Third it focuses on the symptomatology of crisis i e the challenge of moving crisis symptoms to understanding underlying causes as a basis for decisive action Fourth it goes beyond the cliché that crises are both threat and opportunity by distinguishing valid accounts of the origins and present nature of a crisis from more speculative accounts of what potentially exists Fifth it explores how crises can disorient conventional wisdom thus provoking efforts to interpret and learn about crises and draw lessons after a crisis has ended Finally the sixth element is the move away from the conventional focus on executive authorities and disaster management agencies instead turning attention towards how other social forces construe crises and attempt to learn from them Offering important insights into the pedagogy of crisis throughout this collection will offer excellent reading to both researchers and postgraduate students

The Book of Shadow Work Keila Shaheen, 2025-01-14 Shadow work is the key to answering these and other questions truthfully so you can make the life of your dreams a reality Originally founded by psychologist Carl Jung shadow work guides you beyond surface self help bringing you face to face with the unacknowledged parts of yourself the emotions memories beliefs and yes even the shame that shapes how you experience life every day This journey lifts the veil between who you present as on the outside and who you truly are and have the potential to become on the inside Ontopolitics in the Anthropocene David Chandler, 2018-01-19 The Anthropocene captures more than a debate over how to address the problems of climate change and global warming Increasingly it is seen to signify the end of the modern condition itself and potentially to open up a new era of political possibilities This is the first book to look at the new forms of governance emerging in the epoch of the Anthropocene Forms of rule which seek to govern without the handrails of modernist assumptions of command and control from the top down taking on board new ontopolitical understandings of the need to govern on the grounds of non linearity complexity and entanglement The book is divided into three parts each focusing on a distinct mode or understanding of governance Mapping Sensing and Hacking Mapping looks at attempts to govern through designing

adaptive interventions into processes of interaction Sensing considers ways of developing greater real time sensitivity to changes in relations often deploying new technologies of Big Data and the Internet of Things Hacking analyses the development of ways of becoming with working to recomposition and reassemble relations in new and creative forms This work will be of great interest to students and scholars of international politics international security and international relations theory and those interested in critical theory and the way this is impacted by contemporary developments
