Apocalypse Not Science Economics And Environmentalism:

Apocalypse Not Ben W. Bolch, Harold Lyons, 1993 What is likely to kill off the human race first Overpopulation Global warming Ozone depletion Chemicals and insecticides Would you believe none of these Drawing on scientific evidence Ben Bolch and Harold Lyons an economist and a chemist show that the prophets of apocalyptic doom mislead and scare the public with their warnings of impending catastrophes **Apocalypse Not** debunks the alleged global threats to mankind as well as the scares about asbestos and radon It fosters respect for calm objective science while showing that the doomsday lobbyists exploit ignorance and cause hysteria Bolch and Lyons go on to show that contrary to the beliefs of some environmentalists modern society and the growth in population do not threaten our quality of life In fact science and industry have enabled more people to live longer healthier lives than ever before Resources are cheaper and more plentiful than anytime in history In light of those facts the authors take up the perplexing question of why the environmental movement with its apparent death wish has been able to persuade so many people that the human race is doomed Their answer to that question could help turn the tide that threatens to undo the industrial and scientific revolutions This book is the book that will restore good sense to thinking about the environment

Corporate America and Environmental Policy Sheldon Kamieniecki, 2006 This book adds to the environmental politics and policy literature by conducting a comprehensive investigation of business influence in agenda building and environmental policymaking in the United States over time As part of this investigation the author presents an analysis of six cases in which private firms were involved in disputes concerning pollution control and natural resource management In addition to determining how much business interests influence environmental and natural resource policy the book tests possible explanations for their level of success in shaping the government's agenda and policy The study offers a general conceptual framework for analyzing the influence of corporate America over environmental policymaking The research then explores how much firms have influenced Congress the U S Environmental Protection Agency and certain natural resource agencies and the courts on environmental and natural issues since the beginning of the environmental movement in 1970 No other study has examined the ability of business to influence environmental policy in all three branches of government and in such detail

Science and Politics Brent S. Steel, 2014-04-21 Recent partisan squabbles over science in the news are indicative of a larger tendency for scientific research and practice to get entangled in major ideological divisions in the public arena This politicization of science is deepened by the key role government funding plays in scientific research and development the market leading position of U S based science and technology firms and controversial U S exports such as genetically modified foods or hormone injected livestock This groundbreaking one volume A to Z reference features 120 150 entries that explore the nexus of politics and science both in the United States and in U S interactions with other nations The essays each by experts in their fields examine Health environmental and social cultural issues relating to science and politics Concerns relating to government regulation and its impact on the practice of science

Schaeffer, 2003 This best selling text vividly shows how political and economic changes affect people's lives in different settings around the world Globalization the author argues is not completely new Instead the current wave of globalization builds on international institutions created just after World War II and was given new impetus by policies introduced in the 1970s and 80s The new edition has five new chapters as well as updates and changes throughout Visit our website for sample chapters

Liberty Means Freedom for All Steven H. Propp, 2012-11-16 Thomas Anderson has just graduated from CSU Stentoria with his degree in Political Science Its an election year and as a young progressive in California who has been raised by equally progressive parents he is very much concerned with the political issues currently being discussed in the mass media A chance encounter with a fellow graduate named Kelly Kelso however shakes up his settled view of the world He is challenged to examine the rising number of alternatives to the two party system presented by third party movements such as the Libertarian Party and the Green Party and is forced to acknowledge that there is far more to politics than simply Democrat versus Republican and liberal versus conservative Thomas delves energetically into not only the growing Libertarian movement but the free market perspective of the Austrian School of economics as well as the rigid yet compelling view of Ayn Rand's philosophy of Objectivism His explorations grow wider now encompassing the Tea Party movement and the Christian Right tax resisters and gun rights advocates survivalists and militia members anarchists communists and Democratic Socialists as well as the Occupy Wall Street movement He debates the radical environmental views of animal welfare and animal rights advocates and challenges opponents of corporate globalism as well as deniers of global warming as he struggles to reformulate and articulate his own developing beliefs while coping with a sea of conflicting ideas and opposition But this abstract political theory is brought into sharp encounter with concrete political reality when Thomas hears a news report of an armed conflict with authorities taking place just outside of town involving someone with

whom he has become emotionally involved **Environmental Health Perspectives** ,1993 Defending Illusions Allan K. Fitzsimmons,1999 Fitzsimmons examines the science philosophy and law of ecosystems management and shows how efforts to make federal protection of ecosystems the centerpiece of national environmental policy are driven by religious veneration of Mother Earth wrapped in a veil of weak science **Environmental Skepticism** Mr Peter J Jacques,2013-03-28

Environmental skepticism describes the viewpoint that major environmental problems are either unreal or unimportant In other words environmental skepticism holds that environmental problems especially global ones are inauthentic Peter Jacques describes both empirically and historically how environmental skepticism has been organized by mostly US based conservative think tanks as an anti environmental counter movement This is the first book to analyze the importance of the US conservative counter movement in world politics and its meaning for democratic and accountable deliberation as well as its importance as a mal adaptive project that hinders the world s people to rise to the challenges of sustainability Specific consideration is given to the threat of the counter movement to marginalized people of the world and its philosophical implications through its commitment to a deep anthropocentrism Citizens, Experts, and the Environment Frank Fischer,2000-12-19 Claims that the problematic communication gap between experts and ordinary citizens is best remedied by a renewal of local citizen participation in deliberative structures
