4. Locate the two large, protruding eyes. Lift the outer, upper eyelid using a probe. Beneath the upper lid is an inner lid, attached to lower eye called the nictitating membrane. **Answer question 5.**
5. Posterior to each eye is a circular region of tightly stretched skin. This region is the tympanic membrane, or eardrum. Locate the tympanic membrane and **answer question 6 and 7.**
6. Just behind the tip of the frog's head are two small openings called external nares or nostrils. **Answer question 8 and 9.**
7. Besides answering questions in the data and result section you will also be required to correctly label several figures. In the data collection section of write-up label structures A-I from figure 1 below.
