Biostatistics With R An Introduction To Statistics Through Biological Data Use R:

Biostatistics with R Babak Shahbaba, 2011-12-15 *Biostatistics with R* is designed around the dynamic interplay among statistical methods their applications in biology and their implementation The book explains basic statistical concepts with a simple yet rigorous language The development of ideas is in the context of real applied problems for which step by step instructions for using R and R Commander are provided Topics include data exploration estimation hypothesis testing linear regression analysis and clustering with two appendices on installing and using R and R Commander A novel feature of this book is an introduction to Bayesian analysis This author discusses basic statistical analysis through a series of biological examples using R and R Commander as computational tools The book is ideal for instructors of basic statistics for biologists and other health scientists The step by step application of statistical methods discussed in this book allows readers who are interested in statistics and its application in biology to use the book as a self learning text

Biostatistics with R Babak Shahbaba, 2012 *Biostatistics with R* is designed to mimic the interaction between theory and application in statistics Topics include data exploration estimation and clustering with two appendices on installing and running R and R commander

Statistics in Food Science and Nutrition Are Hugo Pripp, 2012-09-10 Many statistical innovations are linked to applications in food science For example the student t test a statistical method was developed to monitor the quality of stout at the Guinness Brewery and multivariate statistical methods are applied widely in the spectroscopic analysis of foods Nevertheless statistical methods are most often associated with engineering mathematics and the medical sciences and are rarely thought to be driven by food science Consequently there is a dearth of statistical methods aimed specifically at food science forcing researchers to utilize methods intended for other disciplines The objective of this Brief will be to highlight the most needed and relevant statistical methods in food science and thus eliminate the need to learn about these methods from other fields All methods and their applications will be illustrated with examples from research literature
