

ASSETS

Assets are resources owned by a business that have economic value. They are the result of investments made by the business or its owners. Assets are recorded on the balance sheet and are classified into current assets and non-current assets.

- Current assets are assets that are expected to be converted into cash or sold within one year.
- Non-current assets are assets that are expected to be held for more than one year.

Assets are measured in terms of their fair value, which is the price that would be received from the sale of an asset in an orderly transaction between market participants at the measurement date.

LIABILITIES

Liabilities are obligations of a business that are expected to result in an outflow of resources. They are the result of borrowing from lenders or the business's own operations. Liabilities are recorded on the balance sheet and are classified into current liabilities and non-current liabilities.

- Current liabilities are liabilities that are expected to be settled within one year.
- Non-current liabilities are liabilities that are expected to be settled for more than one year.

Liabilities are measured in terms of their fair value, which is the price that would be received from the sale of a liability in an orderly transaction between market participants at the measurement date.
