China under Xi Jinping, 2024-11-07 China under Xi Jinping an Interdisciplinary Assessment offers an overview of reforms and

changes that took place in China under Xi Jinping's administration in years 2012-2022. The book focuses on the impact of Xi's rule on China's political system with special attention given to the features that distinguish Xi from his predecessors. The authors discuss among others the Xi Jinping Thought and the nature of his leadership factors contributing to China's economic success, the future of the Belt and Road Initiative, China's response to challenges in terms of security, climate policy, energy transition, pandemics, as well as its ambition to become a global superpower in domains such as space exploration and sports. The volume also analyzes the influence that Xi Jinping's government has exerted on the Chinese state, society and culture, concentrating on areas such as healthcare, education, politics regarding religion, the evolution of Chinese nationalism, the developments in Chinese cinema, music, language and even political humor. To understand what characterizes Xi as a politician and how his time in office is reflected in today's China, experts on China-related matters appear in five parts or dimensions including political, economic, social, cultural and foreign policy issues. This publication will spark the readers' interest in and increase their awareness concerning the developments in the People's Republic of China under Xi Jinping.

Space Science and the Arab World Jörg Matthias Determann, 2018-01-29. When Sultan bin Salman left Earth on the shuttle Discovery in 1985, he became the first Arab, first Muslim and first member of a royal family in space. Twenty-five years later, the discovery of a planet 500 light years away by the Qatar Exoplanet Survey, subsequently named Qatar 1b, was evidence of the cutting-edge space science projects taking place across the Middle East. This book identifies the individuals, institutions and national ideologies that enabled Arab astronomers and researchers to gain support for space exploration when Middle East governments lacked interest. Jörg Matthias Determann shows that the conquest of space became associated with national prestige, security, economic growth and the idea of an Arab renaissance more generally. Equally important to this success were international collaborations to benefit from American and Soviet expertise and technology. Arab scientists and officials had to commit to global governance of space and the common interests of humanity. Challenging the view that the golden age of Arabic science and cosmopolitanism was situated in the medieval period, Determann tells the story of the new discoveries and scientific collaborations taking place from the 19th century to the present day. An innovative contribution to Middle East studies and history of science, the book also appeals to increased business, media and political interest in the Arab space industry.
